

Polyurethane Filling Line

Applications with Polyurethane Filling Line

■ Double Dosing Pump

- ❖ 50 gr/min.-800 gr/min dosing

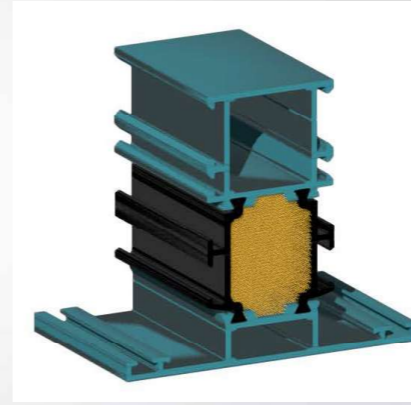

■ Profile Filling Driver

- ❖ Filling profile chambers from 1 cm² to 225 cm²
- ❖ Average 10 seconds/mt. speed filling

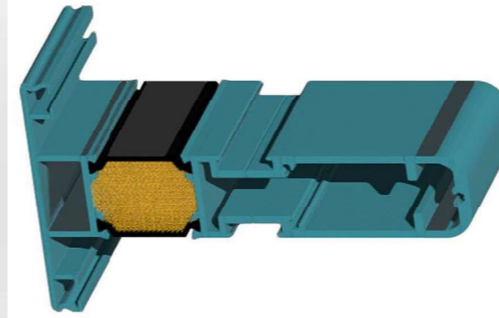

■ Caliber Table

- ❖ Insulation Barrier Profile calibration and assembly without the need for threading-tightening

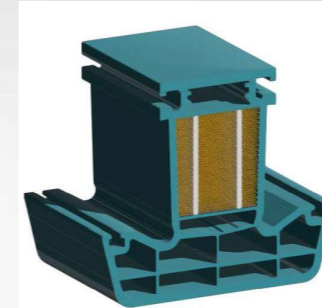

■ Aluminum Door & Window System Profiles Filling

Filling of 6 mt and above Heat Insulated-Non-Insulated Door & Window System Profiles between insulation barrier and profile chambers by injecting polyurethane lowering the thermal conductivity coefficient and low labor cost advantage with the application.

■ Winter Garden System Profiles Filling

By filling the 6 mt and above Winter Garden System Profiles chambers on the polyurethane treats, thermal insulation lower conductivity unit, high strength in carrier profiles thanks to polyurethane fillings.

■ uPVC Door & Window System Profiles Filling

In uPVC Door & Window System Profiles polyurethane filling with backing sheet uPVC profile with self-supporting sheet obtaining
