

Wenzhou Haiyin Packaging Material Co., Ltd.
Product1.

Type	Information
Product Name	PE Coated Packaging Paper
Product Title	Food Grade PE Coated Brown White Kraft Paper
Product Description	<p>Our core focus lies in the production of low-grammage laminating PE paper. Ranging from 30g to 120g, our papers are crafted using exclusively food-grade PE particles and also be combined with aluminum foil for added functionality. Designed to cater to a variety of needs, they find applications in diverse sectors such as tableware packaging, disposable item packaging, hamburger wraps, placemats, and more.</p> <p>One of the key advantages of our PE paper is its exceptional oil and water resistance, making it an ideal choice for items that require protection from such elements. Additionally, our paper boasts enhanced heat sealing capabilities, ensuring secure packaging.</p> <p>Explore the versatility and reliability of our PE paper solutions. Experience the difference of quality materials tailored for your packaging requirements.</p>
Product Groups	COMPLEMENTARY PACKAGING MATERIALS-Bags (Plastic, Paper, Cloth, Nonwoven) and Nets
Product Image	 <p>The product image section contains three photographs of rolls of PE coated packaging paper. The top-left image shows a roll of white paper with a cardboard core. The top-right image shows a roll of silver paper with a black core. The bottom-left image shows a roll of brown paper with a cardboard core. Each roll is partially unrolled, showing the texture and thickness of the material.</p>
