

## Giving new life to plastic

Vivilen is an innovative brand of products leveraging recycled feedstock. The new brand brings together solutions for blow molding, injection molding and heat shrink film production

**VIVILEN rPET is a high-quality polymer which contains recycled plastics:**

-  Beverages
-  Food packaging
-  Cosmetics

A joint project of SIBUR and WOS: a Vivilen PE bag for a line of clothing which contains recycled plastics

**VIVILEN rPO is used for non-food packaging:**

-  Plastic containers for household chemicals and domestic needs
-  Packaging for cosmetic and other products
-  Production of consumer goods such as hangers for clothing

### VIVILEN IS USED IN PRODUCTION OF NEW PACKAGING FOR TIKKURILA PAINTS

In December 2021, PPG Tikkurila Russia announced the release of Tikkurila paints in the Russian market in packaging made from partially recycled plastics. The packaging features a sign informing consumers that it contains recycled materials.
