

Breast Pump

Electronic

Nimo[®] Electronic Single Breast Pump is designed to be ergonomic and easy to use. It has two different suction modes, bionic rhythm and classical fixed rhythm, which imitate the baby's suction rhythms. The device starts operating in low-level mode, helping to initiate the mother's milk flow. With the 4-stage suction level of both modes, the mother can choose the most appropriate rhythm for milking. Thanks to the LED indicators, it can be easily seen which suction mode and which suction power it is in. Not only with electric power but also it can be used with 4 AA batteries. For this reason it can be also use on travel or places where there is no electricity.

150 ml bottle capacity

BPA-free materials

Automatic shutdown after 30 minutes

Maximum vacuum 160 mmHg

Quiet and vibration-free operation

Funnel, breast cushion silicone diaphragm with which milk comes into contact, The silicone valve and bottle are dishwasher safe.

Adjustable Vacuum

You can choose the mode you want from the user panel with 4 different suction power and 8 different bionic rhythm options that mimic the sucking of babies.

Soft Silicone Chest Pillow

Thanks to the specially designed breast pillow, it facilitates the milk flow with massage feature while milking.

Milking With Adapter or Battery

You can easily milk with batteries in areas where there is no electricity such as during travels.
