Bamen Dyed Yarns

BAMEN

Innovative pioneer in yarn dyeing production Bamen is a prestigious yarn dyeing facility all around the world and one of the major yarn exporters of Europe. Producing colored yarn, BAMEN sets the trends in the global arena with focus on customer satisfaction and respect to nature. Our aim is to achieve management of our processes over digital platforms while increasing personal performance and motivation by adopting to the age of digitalisation.

YARN DYEHOUSE

“Bamen promises top of the line production with high tech machinery and upmost quality standards”

Advanced with automated dyeing and chemical distribution systems our dyeing section is available with modern machines for cone dyeing.

- With our expert team and modern testing devices, we continue the task of keeping the quality standards required by quality certificates which were acquired in accordance with dye and Quality Control Laboratories, Adidas Accreditation and ISO Standards.
- Ne 8-70 yarn count range, Single Ply and Multi Plied For Knitting and Weaving
- Reactive, Disperse, Indanthrene, Neon, GOTS Organic Dyed Yarns according to OEKO-TEX standard.
- %100 Viscose, Bamboo, Tencel, Modal, Micromodal, Lyocell, Blends with Cotton, Polyester, Wool, Cashmere
- Cotton/Polyester, Cotton/Wool, Cotton/Cashmere, Cotton/Modal, Viscose/Wool, Viscose/Cashmere etc. blends,
- Corespun, Dualcore,
- Drymax®, Thermosoft®, Drirelease Cotton®, Drirelease Wool®
- Antibacterial Finishing
- Aloe Vera Finishing
- Special Finishing

BAMEN®

Dyeing Machines

Capacity (kg)	Unit	Capacity (kg)	Unit
1200	1	230	2
900	1	100	1
660	2	50	1
550	2	30	1
340	1	5	6

Count available

Ne 8/1 – Ne 70/1 Single Ply, Double/Multi Ply or Twisted

Dyeing Group

Reactive, Vat, Metal Complex, Basic Dye, Acid Dye

Lab Dips

Sensitive dyeing process with high technological machinery

Samples

Optionally laboratory output or 5 bobbin dyeing in sample dyeing machines

Capacity

12.000 kg/ day

QUALITY CONTROL LABORATORIES

Bamen aims to achieve growth by expanding its product variety and boosting its production power in the textile industry with a creative perspective and innovative best service.

Our own quality team members ensure that every yarn is sourced, tested, produced and delivered in the right way to obtain a satisfactory end result.

COLOUR LABORATORY

“Our commitment to investment in the latest technology and production methods enables us to reduce production times that in turn save costs for all parties involved”

Working with zero error tolerance, the yarn labs in yarn facilities follow the technologic developments. The journey starts with raw material acquisition while keeping the standards. Yarn production is always monitored in every process targeting the best quality delivery for clients. The following tests are being conducted accordingly:

- Acid-Base Fastness
- Wet-Dry Friction Fastness
- Washing Fastness
- Rubbing Fastness
- Water Fastness
- Cross Washing Tests
- Phenolic Bleach Fastness

• Yarn Uster tests

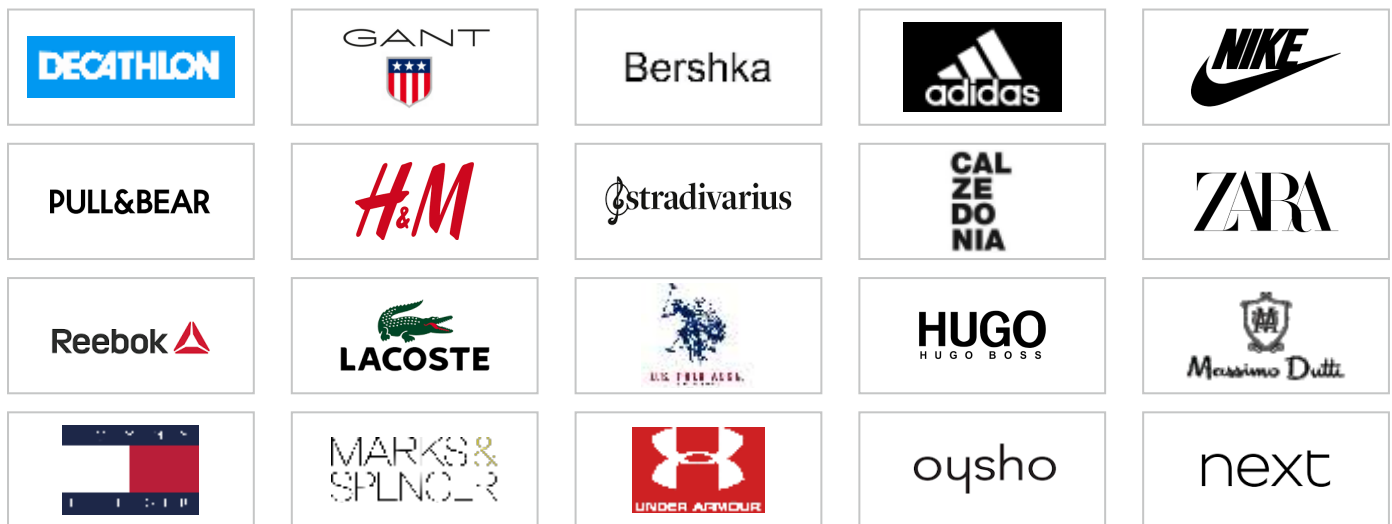

- Uster (Um%)
- Uniformity (CVm %)
- Thin and Thick %
- Neps %
- Hairness
- RKM (yarn strength)
- Elongation %
- Count & Twist
- SKS (Coefficient of friction)
