ABOUT US

Our company provides surgical instruments and medical equipment for health sectors in all branches, and established in 2000 as Academy Medical Instrument Limited Company.

The most important priority of our company is to be able to provide continuity in a human and life-entered perspective, respectful of our own values, awareness of social responsibility in all our business processes and relationships, it is to act with pragmatic ethics.

Be ethical in our relationships with our employees and with all of our stakeholders.

Being fair and respectful as a good customer expects, and fulfilling our obligations on time we show the necessary spirit to bring.

Our Organization we protect the data of the persons and organizations that we do business with and the business partners (information) within the confidentiality principle. In our quality products that we offer, we use our advanced technology to provide our customers with the best solution every time, it is our primary goal to provide customer satisfaction by following the course throughout.

In recent years, we have been producing

**Disposable Sterile Laparoscopy Hand Instruments,
Suction Irrigation Set, Trocar, Veress Needle, Specimen Endobag,
Sterile Dermatome Blades,
Orthopedics and Plastic surgery Kirschner, Cerclage, Archbar wires and Steinmann pins,
Disposables Prosedure Trays, Bowl and Equipments,
Disposable Specimen Containers, Centrefuge Tubes, Storage Containers,
Sterilization Container Seal (with indicator),
Instrument Tip Protection,
Disposable Face Mask (Ear loop and Tie-on),
Disposable KN95 FFP2 and FFP3 with Valve 5 ply Mask,**

with our “Delicate Surgical” brand in accordance with CE norms with the assurance of ISO13485 Medical Device Management System and put them on the world market as sterile and non-sterile. In addition, we continue an intensive project work to produce and develop sterile disposable laparoscopy instruments used in closed surgical operations with the laparoscopy method. In order to ensure that all our products can be supplied safely, it is possible for our company to contact the relevant units and to reach product-based supply requirements.

Our capabilities can benefit from our highly qualified technical service, which are proportional to their experience, without affecting your workflow performance.

Company representative,
Mr. Yüksel KIR

INSTRUMENT PROTECTION

Tip guards and caps are used to protect surgical instruments from damage during transportation, use and sterilization. In addition, they protect user personnel from cut wounds, prevent tears or punctures in the sterilization package, and help minimize reprocessing costs arising from these reasons.
