

The global standard for filtration systems

Nova series high-performance paper filters

Merta Filtrasyon proudly stands as the premier supplier and importer of paper filters meticulously crafted for cutting-edge filtration systems.

Paper filters, essential for the metal processing industry, are manufactured using diverse raw materials and distinct production methods. To ensure the selection of the most efficient paper filter, our recommendations are customized to meet each customer's specific operational requirements, processed materials, and filtration system. Our paper filters are precisely sized to fit your equipment and are promptly delivered to your factory.

The Nova Series Nonwovens are versatile and suitable for a wide range of production processes, including drilling, turning, milling, honing, lapping, grinding, and wire drawing. We offer the broadest selection to optimize your vacuum belt filter, compact belt filter, hydrostatic belt filter, plate belt filter, inclined belt filter, or gravity filter.

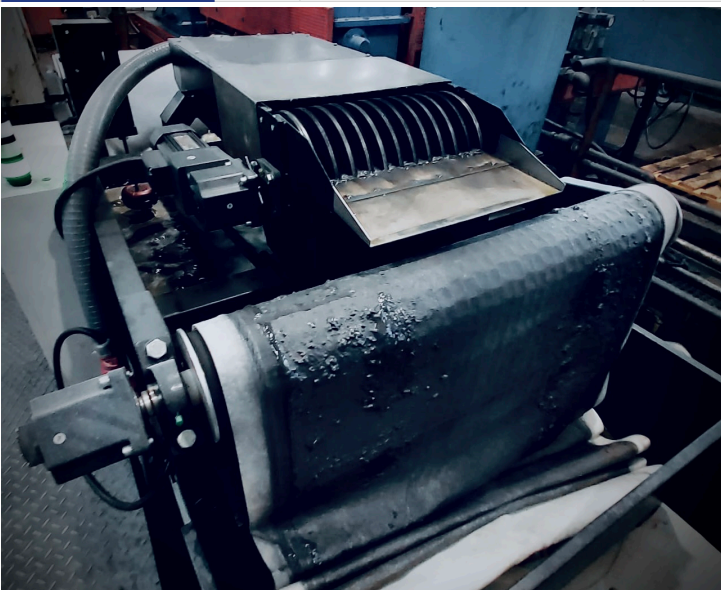

Global standard for filtration systems

Nova series high-performance paper filters

Merta Filtrasyon, with more than a decade of experience in the filtration industry, optimizes your operations with the Nova Series.
