

Underground Directional Drilling Technology and Equipment

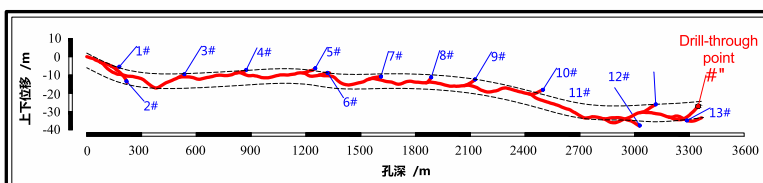

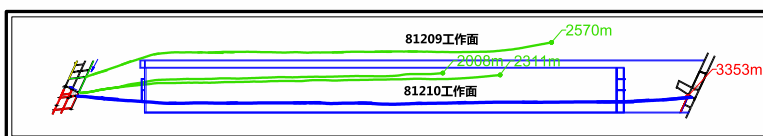

World Record Holder

ZDY15000LD Full Hydraulic Inseam Directional Drilling Rig

It is applied to various mine drilling construction such as efficient extraction of coal mine gas, accurate detection for geological information, advanced and accurate disaster treatment causing by hidden dangers, and rapid emergency rescue in mine accidents.

The series drilling rigs have rotary torque range from 4000N·m to 25000N·m. The drilling capacity exceeds 3000 meter deep.

Latest world record of the main borehole depth of 3,353m

Penetration of directional drilling borehole

DRILLING TECHNOLOGY

Pioneering Underground High-power Directional Drilling Equipment A New World Depth Record Of Directional Drilling In Coal Mine
