

*Large-scale **Curtain Closure** Construction Technology for Mine Water Hazard Control*

Deep-buried, High Pressure-bearing Curtain Wall Construction Technology

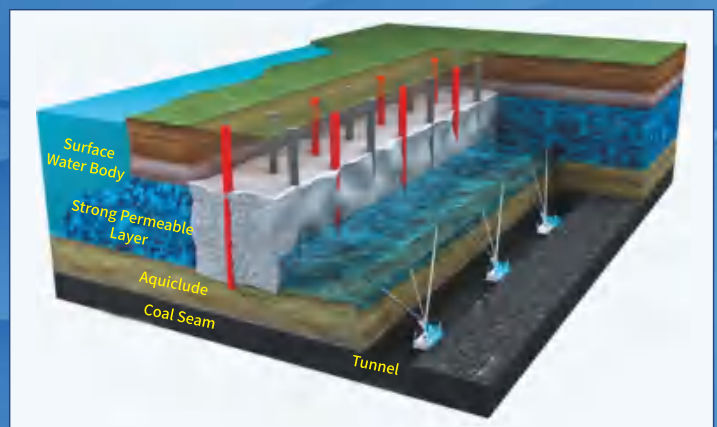

The "root system framework" type curtain wall is used to eradicate the threat of coal mining water damage

Diaphragm Wall Curtain Construction in Open-pit Mine

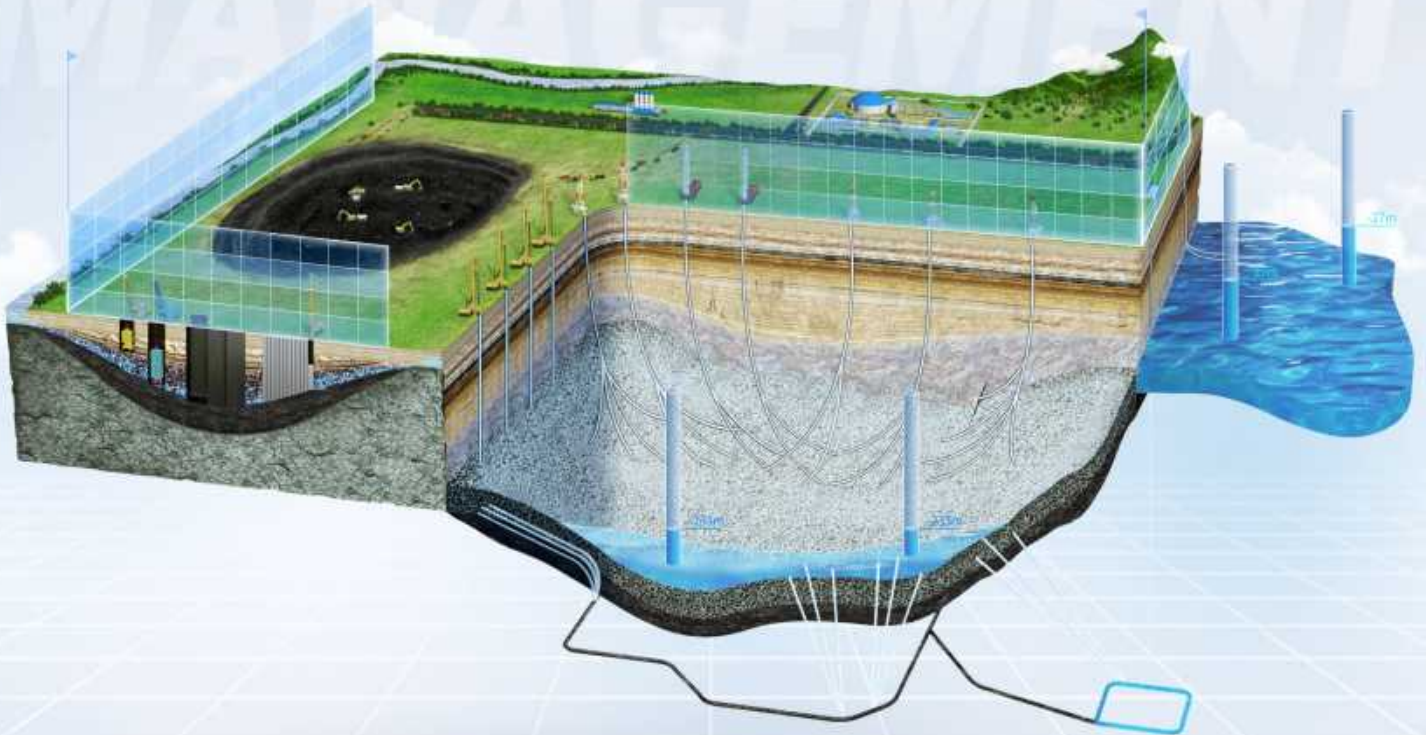

Greatly reduce gushing water in the pit , protect the ecological environment and reduce costs

Water Retention with Curtain for Coal Mining in Burnt Rock Area

Build a curtain grouting technology system for burnt rocks to realize water-retaining when mining coal resource

MINE WATER MANAGEMENT

***Leading Advance Treatment Technology for Water Disaster
Supporting Safe, Efficient and Green Mining***
