Dry Micro

Chemiluminescence Immunoassay Analyzer

Micro Chemiluminescence
Giant Difference

V5000

The 5th generation of
Homogeneous CLIA

REAGENT

No cold chain

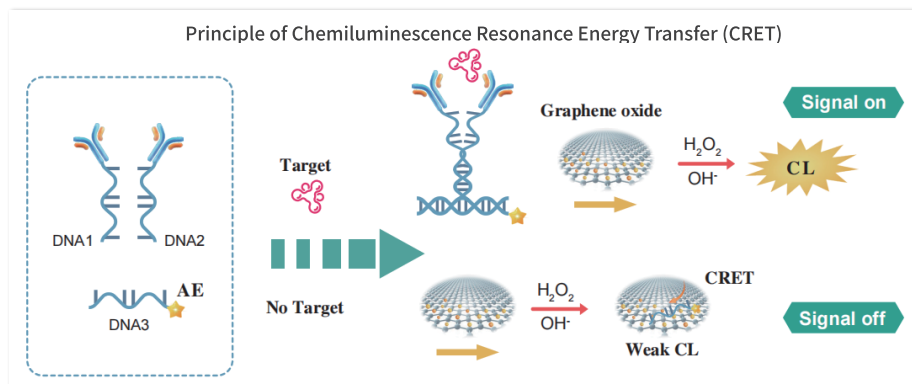

Liyofilize boncuklar

- **Lyophilized Beads**
Adaptable to complex transportation environments
- **Individual packaging**
Reduce excessive reagent consumption
- **Long shelf-life**
Maximum 36 months long shelf life

SPECIFICATION

 Principle	CRET Homogeneous CLIA
 Sample Type	Whole blood/Serum/Plasma/ Oropharyngeal/Nasopharyngeal swab, etc.
 Sample mixing	Built-in mixer
 Dimensions	325×231×213mm
 Communication	LIS/HIS/5G transmission

TECHNOLOGY HIGHLIGHTS

- Combined with nucleic acid technology
Available to transform into molecular diagnostic platform
- Covers more than 95% of clinical testing items
Including proteins and small molecules

Individual packaging

Lyophilized Beads

3 min

FEATURES AT GLANCE

A4 Size footprint

5G

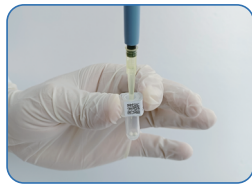

Lightweight

Test Capacities

EASY ACCESS

Adding sample

Placing sample

ASSAY LIST

Bone Metabolism	Inflammation	Cardiac Markers
25-OH VD	CRP	hs-cTnT
Glyco Metabolism	PCT	CK-MB
HbA1c	IL-6	MYO
Thyroid	Immunoglobulin	NT-proBNP
FT3	IgE	BNP
FT4	Hormones	D-Dimer
TT3	Prog	Tumor Markers
TT4	T	tPSA
TSH	E2	fPSA
Anemia	PRL	Infectious Disease
VB ₁₂	LH	SARS-CoV-2 Ag
Fer*	FSH	...
FA*	AMH	
...	β-HCG	
	Cortisol
