/// HORIZONTAL WAVY CURTAIN

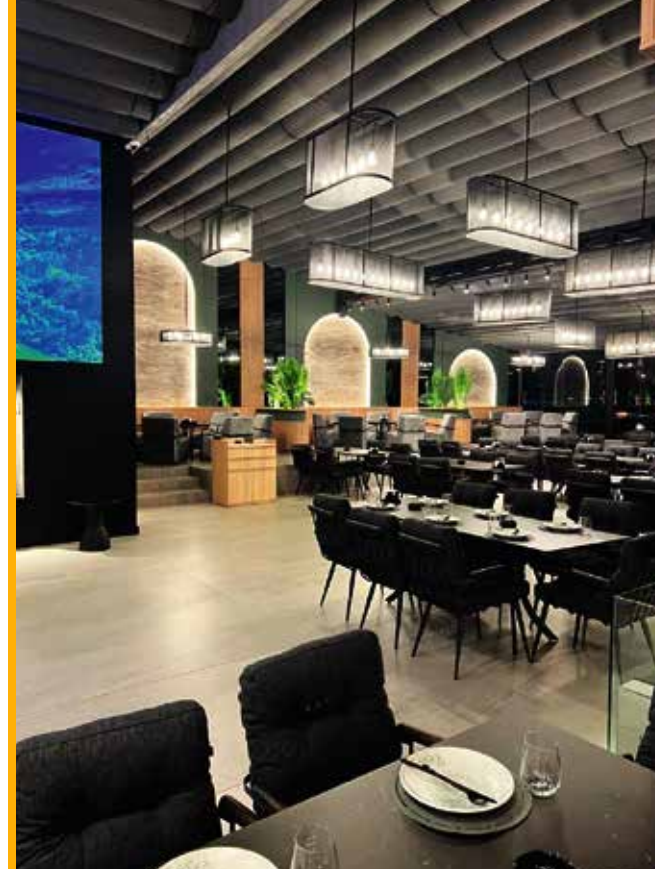

We offer functionality and aesthetic stance together.

Wavy curtains add richness and depth to your spaces.

Wavy curtain sytem can work with motor and remote control.

/// HORIZONTAL WAVY CURTAIN

/// SPHERIC SHAPED CURTAIN

/// Diameter is 17 Meters

What seems impossible is sometimes child's play for us.
We shade spherical and similar shaped areas with our own unique solutions.

/// HORIZONTAL TRIANGULAR SHAPED CURTAIN

Triangle shaped roof curtains are a popular option in modern interior design. These curtains consist of panels cut in the shape of a triangle and are usually suitable for delta windows or dormer windows.

They are the right and popular solution for filtering sunlight and providing privacy in triangular shaped areas.

Triangular roof screens are attached to skylights with specially designed mounting systems. These mounting systems allow the curtains to open and close smoothly.

/// OUTDOOR FACADE CURTAIN (FLAG) FOR BUILDING

The tradition of hanging flags and banners in government buildings, public buildings and similar structures is an important practice that has been going on for centuries in many countries.

Günpay Shading Systems plays an important role in transferring this tradition to future generations with its knowledge in the curtain sector.

Günpay Shading Systems has the ability to produce fabric printed and motorized curtains in very large sizes for every building suitable for hanging curtains.

/// EXTENDED VERTICAL CURTAIN

/// Length is 13 Meters and Height is 3 Meters

Size is not important to us. What is important for us is to realize your big dreams.

Please dream...

/// Length is 30 Meters and Height is 3,5 Meters

/// OUTDOOR JALUZI CURTAIN

External roller shutters provide a higher level of protection against solar radiation. The main advantages include a thermo regulating and protective effect and a reduction in the level of external noise.

They give your outdoor spaces a harmonious and unique look.

/// SHAPED INDOOR CURTAIN

Today's architecture builds asymmetrically shaped structures instead of traditional regular structures.

Günpay Curtain Systems offers unique solutions for asymmetrical structures.

Günpay Shading Systems offer a combination of visuality and functionality thanks to its patented (petty patent) technologies.

Thanks to our petty patented technology, we can produce both motorized and manual curtains in shaped curtains.

/// ROLLER BLINDS

Roller blinds are a useful window covering solution that combines both functionality and aesthetics in home decoration.

Light Control: Roller blinds provide the desired amount of light control. You can adjust the lighting of the space by filtering the sunlight.

Privacy: Roller blinds provide privacy by preventing the outside from looking in. Ideal for living comfortably inside the home.

Energy Saving: Providing thermal insulation and reducing heat loss, roller blinds can contribute to energy saving.

Decoration and Aesthetics: Roller blinds adapt to the decoration of the space with different colors, patterns and styles. It offers both a stylish look and increases functionality.

Easy Maintenance: Regularly clean roller blinds from dust and wash them when necessary. They are very easy to clean.

Remote Control or Automation: Some roller blinds are equipped with remote control or automation features. This allows them to be opened and closed on demand.

Long Life: Roller blinds made of durable materials can be used for a long time.

Noise Reduction: Quality roller blinds reduce external noise and provide a quiet environment.

Roller blinds stand out as an option that meets the needs of modern life. They can be easily used in the kitchen, bedroom, living room and other areas of the house. Roller blinds, which both beautify your home and allow you to use it in a practical way, offer many advantages together.

/// PROJECTION CURTAIN

Projection screens are an indispensable part of image projection systems. It is not possible to get a clear and high quality image without a good projection screen. Projection screens are produced in different types and can be selected according to the intended use.

Roller Projection Screens: Roller projection screens can be easily folded when not in use. Their matte white fabrics do not reflect light and show pixels less. These curtains are preferred for their affordable prices and performance.

Motorized Projection Screens: Motorized projection screens are controlled by a remote control and can be automatically switched on and off remotely. They increase the enjoyment of cinema with their high projection rate.

Tripod Projection Screens: Free-standing projection screens are portable and easy to set up. They are generally preferred in meeting rooms, schools and homes.

Transparent Projection Screens: Transparent projection screens reflect the image by receiving light from the back side. These types of screens are especially used in exhibitions and fairs.

Projection screens have a wide range of uses from watching movies to educational institutions. G n pay Curtain Systems offers the most suitable solutions according to your needs.

/// SEPARATE CURTAIN

Separation curtains used in hospitals are an important factor to ensure comfort and privacy in the treatment process of patients and in the working environment of medical staff.

Light Control: It is produced from special fabrics to control sunlight. They are used in treatment rooms to help patients adjust the amount of light.

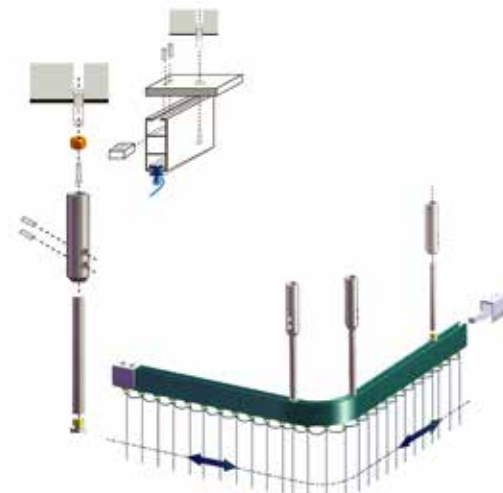

Privacy: Used in areas that require privacy, opaque curtains make both patients and medical staff feel comfortable.

Antibacterial: Preferred to provide a hygienic environment, antibacterial curtains are suitable for use in hospitals.

Track and Curtain Systems: Hospital rail and curtain systems allow easy opening and closing of curtains. These systems provide an organized appearance and facilitate the cleaning of hospital rooms.

Choosing the right curtain in hospitals is of great importance to control sunlight, ensure privacy and meet hygiene standards. In addition, hospital track and curtain systems ensure that curtains are used in an organized manner and improve the working environment.

/// AIRPORT & MARITIME CURTAIN

The use of solar shades on the windows of air and sea control towers provides safety and comfort benefits.

Minimizing reflection and glare on windows and monitors improves employee performance, reduces the margin for error and shortens work processes.

Ship and airplane traffic managed with the help of numerous monitors and navigation devices, using such shading systems minimizes the annoying sun rays from windows and provides a safe working environment.

/// SPECIAL SOLUTIONS

We have a wide range of applications with our various shading solutions. Each with unique aesthetic and functional features, our shading solutions provide the desired level of light, temperature control and privacy and can be customized to suit interior and exterior decoration.

Technological advances have significantly increased the functionality of our shading systems.

Our modern systems feature sensors and intelligent controllers that can automatically adjust shades according to the intensity and angle of sunlight, as well as external conditions such as temperature.

This automatic adjustment ensures optimal light and temperature control without the need for manual intervention.

Our products can be easily integrated with smart home and building management systems.

Users can control the shades remotely via smartphones or voice-controlled devices, offering convenience and flexibility.
