INTRODUCING  
NEW GENERATION  
NON-MIGRATING  
PROCESSING AID  
& MODIFIER

## PROCESSING AID, MODIFIER AND BONDING AGENT

*for* TRANSPARENT & OPAQUE APPLICATIONS

Polycom – CL is used as ■ Non – migrating processing aid and impact modifier for Polyethylene and Polypropylene extrusion and moulding applications. ■ Coupling agent, compatibilizer, dispersing agent for various compounds like Halogen Free Flame Retardant (HFFR) ■ Wood composites, recycle material. ■ Layer resin for various polymers. ■ Helps in extrusion coating for improving bonding between aluminium foil and Polypropylene / Polyethylene ■ Used as purging agent.

### APPLICATIONS

- Shrink films ■ PET Preforms ■ Flexible packing ■ Woven bags ■ Pipes ■ Cables
- PP/PE glass fiber compounds ■ Wood composite ■ Halogen free flame retardant compounds
- Recycle materials ■ Bitumin ■ Purging compound ■ Laminations ■ Tie layer resin

### KEY ADVANTAGES

- Eliminates melt fracture/shark skin ■ Improve tensile strength & elongation ■ Improve gloss ■ Improve rheology property
- Reduce carbon formation in die ■ Reduce microns of films ■ Thickness variation is controlled
- Eliminates slippage during processing ■ Improves adhesive strength

AN ISO 9001:2015 CERTIFIED COMPANY
