

PVC shrink wrap rolls are perfect for wrapping: Boxed products, candles, gift baskets, stationery, or other non-consumable products. The low temperature required to shrink makes PVC an excellent option for heat-sensitive products.

	Unit	Tolerance
Density	g/cm ³	1.34 - 1.4
Temperature	°C	<20
Thickness	μ	17 - 100
Width	mm	150 - 750
Elasticity	N/mm ²	48<

PVC SHRINK FILM PRODUCT HIGHLIGHTS:

- **Exceptional Clarity:** Our PVC shrink films offer exceptional clarity, ensuring your products are beautifully showcased.
- **Even Shrink Characteristics:** When controlled heat is applied, this film shrinks uniformly in all directions, creating a smooth and professional appearance.
- **Wide Sealing Temperature Range:** Our PVC shrink films have a broad sealing temperature range, making them versatile and easy to work with on both manual and automatic equipment.
- **Versatile Applications:** These films are suitable for a wide range of applications, including packaging of CDs, DVDs, candles, glass jars, and more. They conform nicely to odd-shaped items, providing a snug and wrinkle-free package.
- **Moisture-Proof Packaging:** Create moisture-proof packages that protect your products with our PVC shrink films.
- **Not Approved for Direct Food Contact:** Please note that our PVC shrink films are not approved for direct food contact.
