

✦ **CMS Simplicity**  
Combined with Glass Clarity

## Models & Sizes

	Glass Thickness	Min. Glass Size	Brush Quantity	Low-E
<b>VGW4.50</b>	3-32 mm	350x170 mm	6	
<b>VGW4.60</b>	3-32 mm	350x170 mm	6	
	Automatic Brush Positioning			

VGW	Glass Width (W) (mm)				Machine Dimensions (mm)							
	2000	2500	2800	3300	L1	L2	L3	2000	2500	2800	3300	
Glass Length (L)	<b>3000</b>	3020	3025	3028	3033	3260	2450	3260	H1			
	<b>4000</b>	4020	4025	4028	4033	4100	2450	4100				
	<b>4500</b>	4520	4525	4528	4533	4600	2700	4600				
	<b>5000</b>	5020	5025	5028	5033	5300	2450	5300				
<b>Jumbo</b>	XL20	XL25	XL28	XL33	Please contact your sales representative for different size requests.							

## System Configuration

VGW Series that is specially designed to wash and dry glass sheets automatically with high efficiency and performance, is also configurable according to your needs and your space. VGW series is upgradable in models and technology for your future needs.

### A- Inlet Conveyor

The Inlet Conveyor is a loading zone conveyor that is designed to load glass sheets into the washing line.

- + Easy loading feature on big size glass sheets with loading support legs
- + Compatibility for Jumbo size glass sheets
- + Ability to add both functions and components with modular infrastructure
- + Step-by-step or continuous feed control (Standard in 4.50 and 4.60 versions)

### B- Washing/Drying Machine

Washing and Drying Machine has been developed in order to wash the glass sheets with high quality washing brushes at maximum quality and to reliably dry the sheets with specially designed fans.

- + Maximum sensitivity, maximum quality
- + Long-lasting and maintenance-free washing system
- + Smooth drying performance
- + Vibration free working thanks to heavy and robust steel construction structure

### C- Outlet Conveyor

The Outlet Conveyor provides the transfer of glass sheets from washing and drying machines to the next process.

- + Compatibility for Jumbo size glass sheets
- + Ability to add both functions and components thanks to the modular infrastructure

## Key Features

 **Adjustable Washing Speed (Line Speed)**

 **Configurable System Infrastructure**

 **Fast and Stainless Washing Performance**

 **External Brush Cab**

External cabs provide safe & clear washing performance and the process can be watched by the help of observation windows.

 **Water Tank**

- + Critical water level control
- + Water temperature control
- + Sand filter
- + Stainless steel water tanks
- + Water hardness measurement (Opt.)
- + Automatic water drainage and renewal system (opt.)

 **Jumbo / Tandem Line Compatibility**

Compatible to be integrated with multiple pressing units to press jumbo sized insulated glass units in single operation. This compatibility allows you to upgrade your machine to tandem/jumbo pressing line any time with low costs.

*Servo pressing option is required for compatibility*

-  Integration with consecutive processes (*communication and speed integration*)
-  Automatic start-stop system for washing brushes and glass drying valves
-  Specially designed and low noise drying fan cabinet
-  Possibility to upgrade capacity and version at any time
-  Low energy consumption drying system
-  Washing parts made of stainless steel

## Optional Features

 **Opt. VGW. DFT**  
Additional Sand Filter  
& Water Tank

 **Opt. VGW. SCF**  
Self Cleaning Water Filter

 **Opt. VGW. SSB**  
Stainless Steel Outer Body

 **Opt. Tilting Table**

Transfers glass sheets from vertical processes to horizontal processes

 **Opt. 8 Glass Conveying Height 650 mm (± 50)**

+ Standard working height 520mm ±50

 **Opt. VGW. BSS Brush Speed Synchronization**

Sensitive glass washing results can be achieved in Low-E coated plates with the adjustable washing brush speed.

+ Optional for version 4.5    + Standard for version 4.6

 **Opt. RAF Remote Access**

Remote access feature provides advanced online assistance and troubleshooting

+ Valid for VGW 4.5 and VGW 4.6 models.

 **VGW. LAS**  
**Low-E Glass Surface Detection**

+ It is used for warning in faulty glass feeds.

 **Opt. AY1 Conveyor Lighting**

 **Opt. DSB Washing Outlet Stock Management**

+ Standard for VGW4.50 and VGW4.60 versions.

★ Glass Thickness : Min. 3 mm

★ Min. Glass Dimension: 350x170 mm

		PPL4.5			PPL4.6		
Minimum Glass Size for Press		170 x 350 mm					
Minimum Glass Thickness for Press		3 mm					
Maximum Conveyor Carrying Capacity		250 kg/m					
	Double Glazed Units	Opt. 3: Triple Glass	Opt. 4: Quadruple Glass	Opt. 5: Step Glass	Panel Press	Max. IG Thickness	Conveyor Type
PPL4.5			-	-	Hydraulic (Opt. Servo)	60 mm	Belt
PPL4.6					Servo	60 mm (100 mm for Opt.4)	Belt

## System Configuration

PPL4.0 Serie is designed for homogenous pressing process in order to produce high-capacity insulated glasses. PPL4.0 Serie is configurable according to your preferences and needs.

### A- Assembly Conveyor

Assembly conveyor is designed to place spacer frames on the clean glass coming from washing unit.

#### A1 - Manual Frame Mounting System

- + Manual Positioning
- + Automatic Positioning (Opt.) for 4.6 (Std.)
- + Spacer Alignment From Top for Big Sized Glasses (Opt.)

#### A2 - Double Section Frame Mounting (Opt.): Increase productivity without increasing line's length.

- + Manual Positioning
- + Automatic Positioning (Opt.) for 4.6 (Std.)
- + Spacer Alignment From Top for Big Sized Glasses (Opt.)

### B- Pressing Unit

Pressing unit is a product of technology, experience and industry experts coming together. The system can be configured according to your present and future needs.

- + Modular Chassis and Functions
- + Strong and Sturdy Chassis
- + Precise pressing from 4 points
- + Hydraulic / Servo front panel drive system
- + High speed automatic vacuum system

### C- Press Output

The Press Output is designed to transfer the pressed insulated glass unit for secondary sealing application

- + Configurable
- + Communication protocol that enables synchronization with consecutive systems

- ▬ C1 - Conveyor (Std.)
- ▬ C2 - Tilting Table (Opt.)
- ▬ Structural Glass Support System (Ops.)

## Key Features

 **Low-E Glass Pressing**

 **Modular Infrastructure**

 **Sensitive 4 Point Pressing**

### **Straight and Shaped Glass Pressing**

Straight and shaped glass pressing from CMS Shape Library can be performed optimally.

### **Recipe Management**

Save your datas and settings

### **Operator Panel**

Take control under favor of user friendly operator panel

### **Remote Access**

Remote access feature provides advanced online assistance and troubleshooting

### **Jumbo / Tandem Line Compatibility**

Compatible to be integrated with multiple pressing units to press jumbo sized insulated glass units in single operation. This compatibility allows you to upgrade your machine to tandem/jumbo pressing line any time with low costs.

*(Servo Pressing Option is Required for compatibility)*

-  Modular infrastructure that will provide you the solution you are looking for with its versions and options.
-  Possibility to increase your production capacity at minimum cost in the future thanks to the smart modular system
-  Minimum transportation cost

## Optional Features

### Opt. PPL. PGK Press Inlet

The easiest way to compensate for operator-induced delays and increase efficiency in the assembling system

### Opt. PPL. 4PC Tilting Table

It is suitable for transferring the insulated glass unit to the sealing process. The insulated glass unit in the vertical position can be moved to the horizontal position easily and with minimal effort.

### Opt. Automatic Adjustment of Frame Mounting for Structural IG Units

Standard for PPL4.6 structural glass models.

### Opt. SPP Servo Press Front Panel

Servo front panel drive system provides precise pressing by applying different pressure to glasses of different thickness and size.

- + Automatic Pressing Pressure Setting
- + Automatic Pressing Time Setting

Available as standard in PPL4.6 models.

### Opt. PPL. GPP Gas Filling System

The system is equipped with software infrastructure (mathematical model) and equipment that provides the best gas filling performance at high speed. It provides minimum gas consumption with gas filling application from the bottom edge.

- + Smart functions
- + Mathematical flow control technology
- + Glass height measurement
- + Glass length measurement
- + Narrowing the press area
- + Spacer and glass thickness measurement

Opt. SPP Servo Front Panel drive comes together.

- + Gas filling of all IG Units except stepped IG, for models 4.5
- + Gas filling of all IG Units and stepped IG, for models 4.6

### Opt. FS Step Glass (Structural Glass) Function

Developed using precisely positionable mechanisms for safe and stable pressing of facade glass

- + Precise Positioning
- + Strong Mechanical Structure
- + BE, LE, RE, UE: Max: 150 mm
