

# PRODUCT INFORMATION

## eaZiSlide IMPULSO DOPPIO

The perfect push-to-open system with integrated SOFT CLOSE function for your sliding doors and pocket doors – that's eaZiSlide IMPULSO DOPPIO.

Be excited about the functionality and advantages this system offers: A light tap on the face

of the door leaf quietly ejects the door. When closing the door with eaZiSlide IMPULSO DOPPIO, a push is sufficient to accelerate the door in the closing direction. The door is automatically pulled into the end position by eaZiSlide IMPULSO DOPPIO.

The double-sided damping unit guarantees convenient operation. The door is closed safely.

### Push-to-open

The special feature of this system is that the door is ejected by a light tap, so that no handhold is required at the front of the door to open it.

### Comfort

In addition to the convenient function by tapping the door, the push-to-open system guarantees quiet and smooth opening. The closing process is also smooth and almost noiseless.

### Quality

All sliding door systems are manufactured in our production facility in Germany. Each product is 100% quality-tested, so that a consistently high product quality can be guaranteed.
