

PROTECTIVE PLASTIC SHEET

OKIflex®

WHY USE OKIFLEX?

Provides you best cable protection and saves you money and time.
OKIflex is consist of **two layers**.

First layer is UV resistant can be any color. White side can be decorated with flexographicprint up to 8 color upon request.

PE film is laminated to **Second layer** UV resistant as black carrier sheet.
OKIflex is essential where you need extra protection against the external impacts.

It is mostly used to protect the cable wire drums against the forklifts touches and damage of **UV light** in case of exterior storage.
