TURKIYE 2023 PRODUCT CATALOGUE

Your products are 100% protected
by GRIMAS Cap Sealer.

GRIMAS CAP SEALER is the best choice thanks to it's convenient and problem-free operation.

It can seal all packages with diameters between 20mm and 130mm using the appropriate high frequency coil.

The machine provides complete sealing without applying heat to the package.

It's suitable for operation at high speeds (max 25 meters per minute) depending on the high frequency coil.

Suitable for any conveyor.

Operates with packages in different sizes thanks to the height adjustment facility.

LCD Panel which is available in English allows for easy and convenient use.

Operates on a 24/7 basis thanks to it's air- and water-cooling systems.

The security software follows and keeps every aspect of the sealing process in check.

Foil detection module and electrical height adjustment module are added upon request.

Stainless steel case.

2 Year full warranty.

Your products are 100% protected by GRIMAS Cap Sealer.
