PROVIDES SUPPORT TO YOUR BUDGET

SQUARE

SQUARE SERIES

Highlights

1 Base suitable for 8 mm - 10 mm glass

The square series allows the use of glasses of different thicknesses with bases in desired dimensions. Thus, it becomes possible to offer alternative suggestions.

1

2 Various rail options

A flush-mounted threshold used in-ground provides a flat and ergonomic living space.

2

3 Auto closing guide

While closing the windows, the guide closes automatically with the last move. This makes it easier to use curtains.

3

4 Side mast EPDM wick

The EPDM gasket in the edge column profiles retains heat inside while preventing adverse weather conditions such as water, wind, and dust from entering the balcony

4

5 3 different locking mechanism options

Choose different lock options for your 3 different specially designed locks and glass balconies.

5

6 Aluminum wick application

You can choose aluminum wick application according to your preference, aiming for a longer lifespan of use.

6
