

## Glass Lifting Machine -CLT400

- ✓ **Maximum grabbing weight: max 1800kg, with 2-18 vacuum and high temperature resistant suction cups**
- ✓ **Security cylinder protection, not afraid of power cuts**

## Different product view

**POWERFUL FACTORY / OEM SERVICE / RTS SHIPPING**  
Focus on glass processing line:15 years

## Application

**Pneumatic components: SMC or AirTAC brand.**  
**Manipulators can be used in laminated glass production lines, insulating glass production lines, glass cutting lines, glass edge grinding machines, etc.**

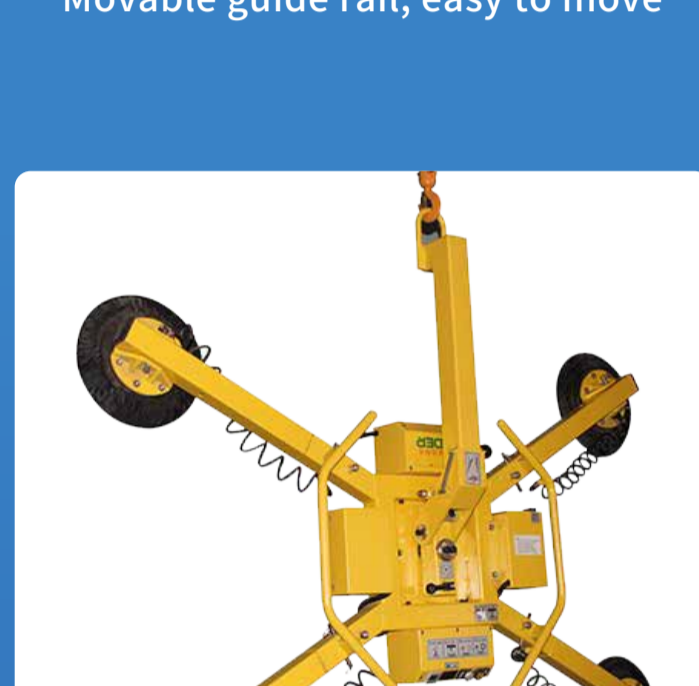

Film & glass combine table and EVA film shelf

## Product details

### 1 Key point.Operation

To make smarter for every glass deep processing company. greener. More energy-saving, more humanized high-end manufacturing machine.

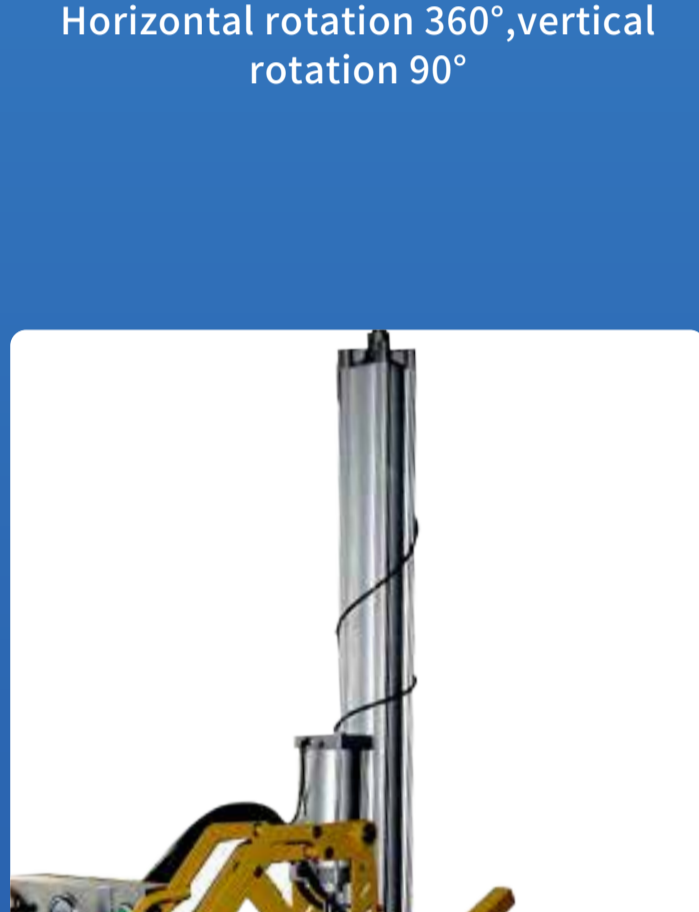

Movable guide rail, easy to move

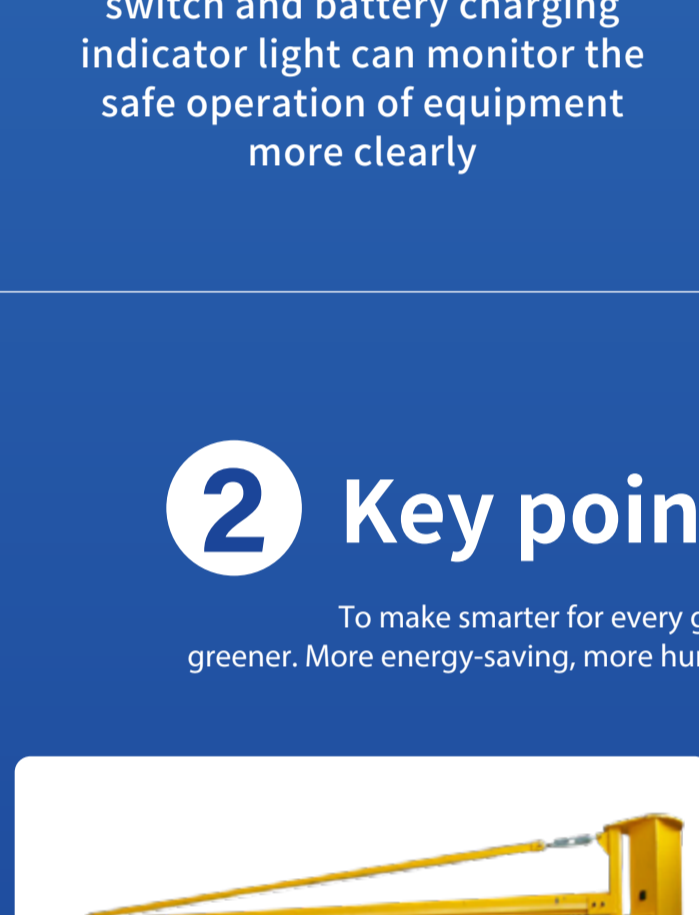

Security cylinder protection, not afraid of power cuts

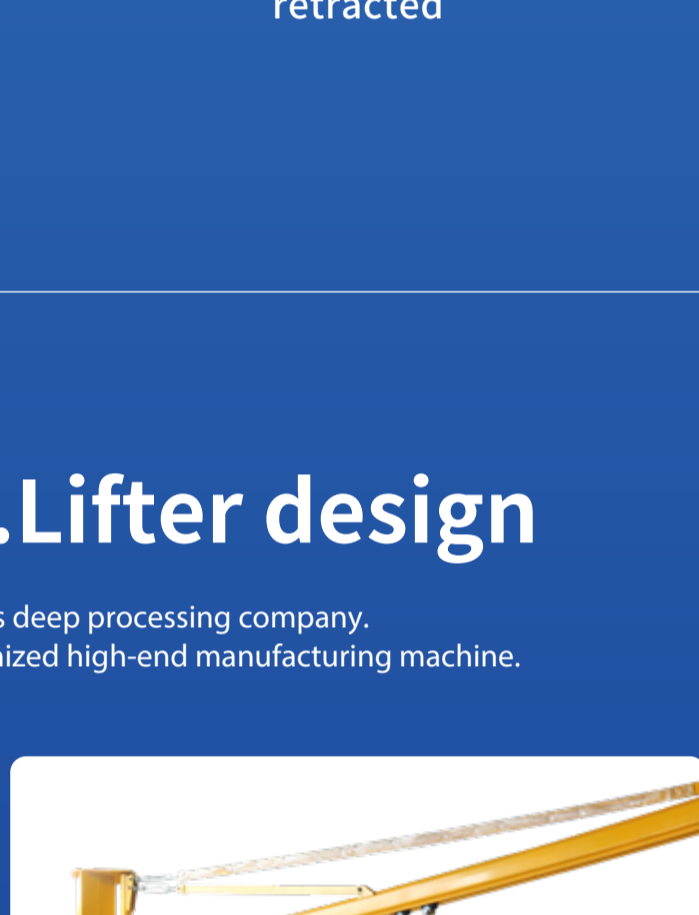

2-18 High temperature resistant silica gel suction cups, no damage to the glass. Suction cup controlled separately, easy to suck small glass

Horizontal rotation 360°, vertical rotation 90°

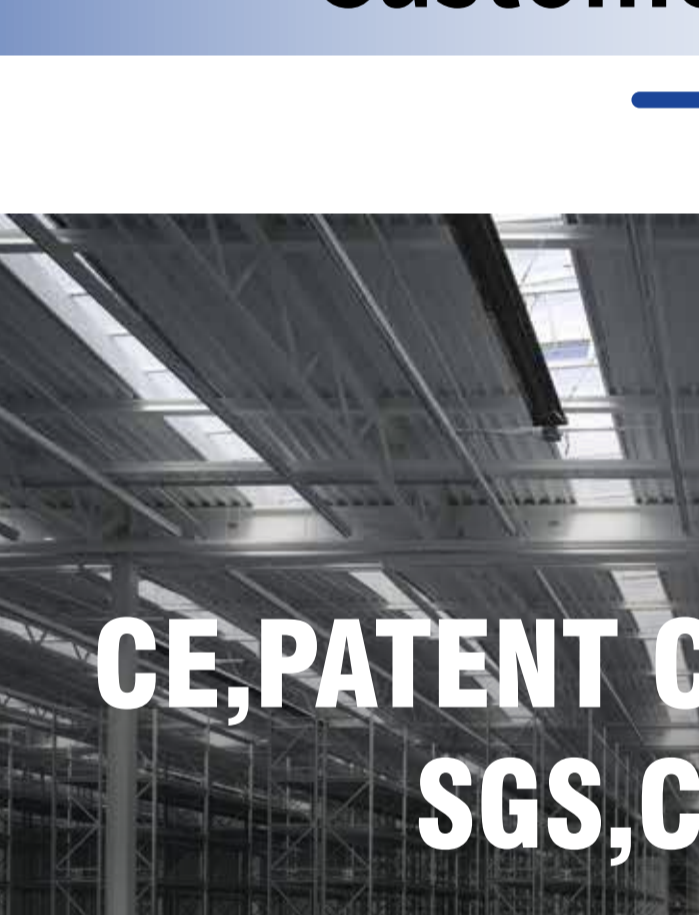

Digital display vacuum pressure switch and battery charging indicator light can monitor the safe operation of equipment more clearly

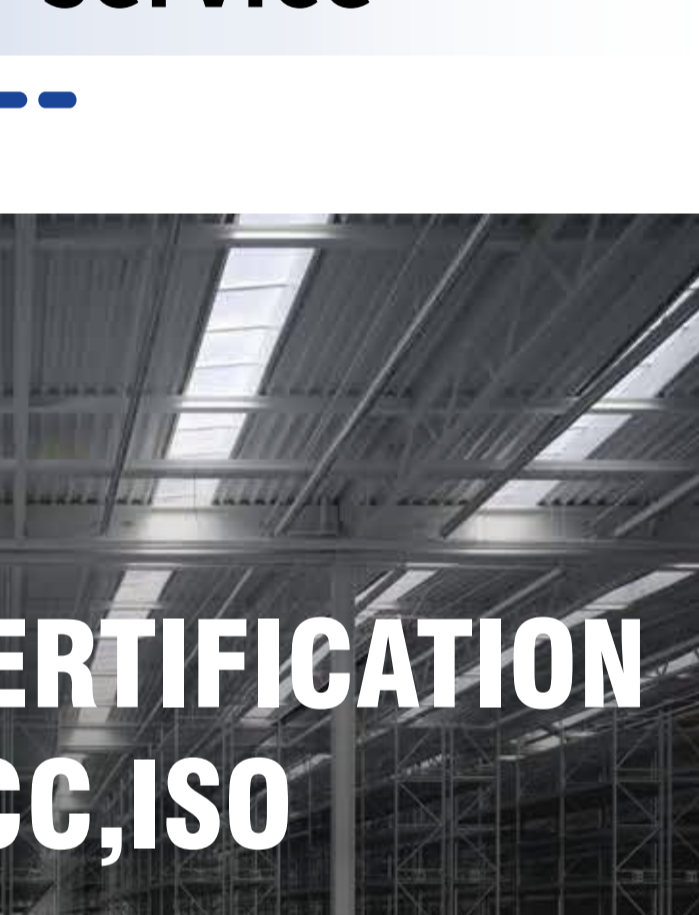

Robotic arm can be freely retracted

### 2 Key point.Lifter design

To make smarter for every glass deep processing company. greener. More energy-saving, more humanized high-end manufacturing machine.

Leaser cutting, the error value can be ignored

The appearance of the whole electrostatic spray

## Customer service

**CE, PATENT CERTIFICATION**  
**SGS, CCC, ISO**

Free OEM service

Pre-sale: 7\*24h, factory audit through video

Video factory inspection

RTS shipping or 15-20 days shipping

1 year machine warranty

15 years experience engineer guides installation online

## Certificate show

## Real customer feedback
