GENDRRE

COMPANY PROFILE

Gendrrre is dedicated to developing high-precision, High wear and corrosive resistant parts, makes full use of advanced processing and testing equipment, and cooperate with world's top extrusion machine enterprises and powder metal steel suppliers, our products have the same precision and wear-resistant with Germany/Japan product, we provide you with better quality extruder fittings with high efficiency.

Our high efficiency team is led by the 20 years' experience engineer Mr. Rong Guo Li who is the founder of cordwood screw elements in China. We've formed efficient, scientific and reliable technology procedure by learning from those world's leading extruder manufacturers. From the very beginning of receiving an order, we ensure that the production is strictly in accordance with the drawing. QC department inspect every size in accordance with the requirement to ensure quality and each technical index reach 100%

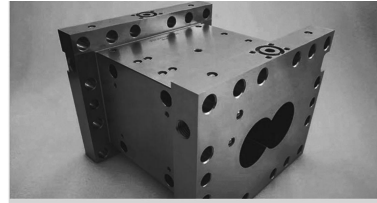

ADVANCED PROCESSING EQUIPMENT AND TECHNOLOGY

We have world's leading machining center and CNC vertical machining center, CNC horizontal thread grinding machine and CNC spline milling machine, with years' of processing technology to ensure same precision and wear-resistance with Germany and Japanese products.

We have same material as Coperion WP15 and WP25, Berstorff Z44, Z55, Leistritz VSA-4, VSA-2, Toshiba AW2-6, ACW1-3, JSW LSP-H, LSP-2, etc. We could ensure 30 days lead time in case of material in stock.

Gendrrre focus on:

- Qualification and technological process of precision machining in the twin-screw extrusion industry.
- The latest products of wear-resistant parts supplier.
- Develop suitable collocations or combinations programs for the customers.
- Retain our competitiveness within the industry.
- Provide customers with related services in assembly processes and handling tools.
- After-sales tracking.

About us:

Gendrrre Extrusion Industry Co., Ltd. Outstanding supplier of twin screw extruder accessories in China.

Our product can match or exceed the quality standard of the original equipment manufacturers.

Our product can represent the highest level in China and compete with any of your suppliers.

We have established long term cooperation with world's leading extruder suppliers and plastic manufacturers. In our company's processing list you can find information of nearly all the well-known twin-screw extrusion equipment manufacturers who are witnessing our knowledge of and contribution to this industry over the years.

Customer requirement could be met with high quality material, advanced machinery produce with latest technology-proceed, strict inspection. Those could ensure our product with high precision and durable.

GENDRRE COMPANY CAN ALSO CUSTOMIZE THREADED SCREW ELEMENTS WITH SPECIAL SPECIFICATIONS FOR CUSTOMERS.

Gendrrre import Europe technology to manufactures eccentric screw elements which could create high pressure and fully stir in the plastic. The plastic material could be fully dispersed quickly propel, and intensive mixing. SME, ZME, TME etc all kinds of screw elements are required by different customers.
