TAPE

Profom FOAMED PP TAPE

Foamed PP Tape (PROFOM) is a flexible single layer Foamed and Mono-Axially Oriented (MDO) Polypropylene film which have been structured by various thicknesses.

DijitalPort offers high tenacity with uniform closed cell foam structure. Monoaxial orientation with gas foamed prevent possible tearing in the traverse direction and provide high tensile strength to best working conditions.

Foamed Polypropylene Tape usually using for power and communication cable applications as a binding film.

TYPE & STRUCTURES

FOAMED PP TAPE

Single layer white opaque color tape.

Materials

Polypropylene

Applications

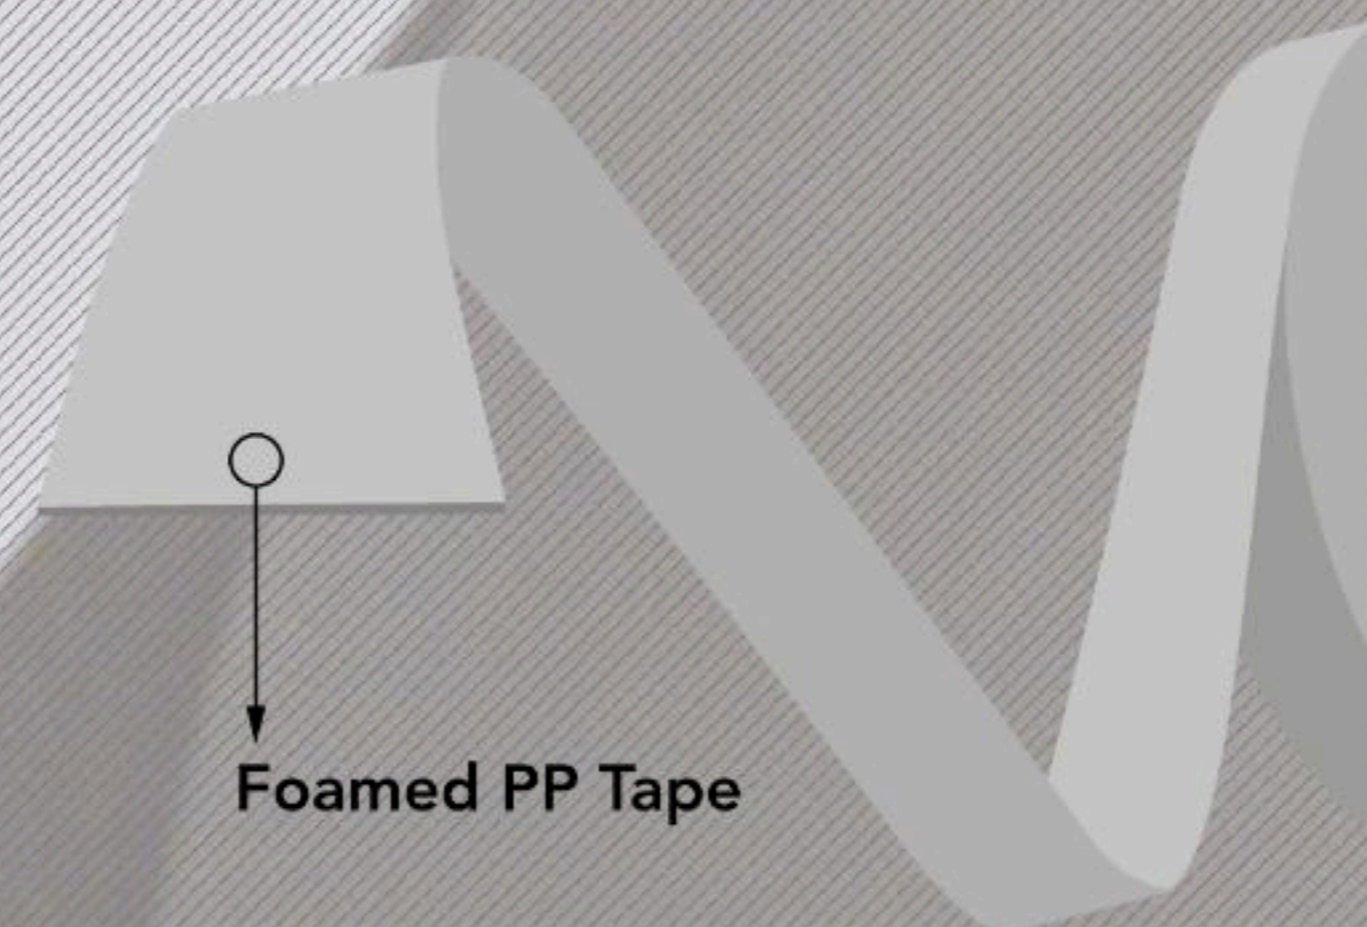

Power and Communication Cables.

Also Known As

Foam Polypropylene, PP Tape, Strip.

Product Range

Item/ Code	Thickness μm	Weight gr/m ²	Density gr/m ₃
PP80	80±4	40±2	0.50±2
PP100	100±6	50±3	0.50±2
PP125	125±6	63±3	0.50±2
PP150	150±8	75±4	0.50±2
PP175	175±10	88±5	0.50±2
PP200	200±10	100±5	0.50±2
PP250	250±14	125±7	0.50±2
PP300	300±16	150±8	0.50±2

REWINDING & PACKING

REWINDING SIZES

- IC** Inside Diameter
76.2, 120 & 152.4
- DC** Outside Diameter
Max. 1300 mm Roll
- BG** Tape Width
Min. 10 mm
- M** Core Material
Paper & Plastic

PAD (DISC) REWINDING
