Features:

- A central venous catheter is a long, thin, flexible tube used for intensive infusion and/or transfusion therapy, invasive central venous pressure measurement and for blood collection
- The catheter is made of specially formulated biocompatible polyurethane material which provides strength during insertion and also softens at body temperature to conform to the body tissues and reduces the risk and vascular trauma
- Specially designed soft & beveled tip for smooth & easy insertion
- Sufficiently radio-opaque material of catheter with clear, definite marking facilitates correct placement of catheter tip
- Catheter with single or double or triple or quadruple lumens in various lengths
- Soft flexible J tip guide wire prevents the vessel perforation and also provides good torque to ensure firm insertion
- The product is individually packed in tray and sterilized by ethylene oxide
