Socks and tights

Modern technology and high quality

The process starts with Lonati knitting machines that ensure precision and productivity. The Tecnopea automatic planting machines guarantee the perfect shape and comfort of the socks. Technopack packaging modules automate the process packaging, ensuring the safety and presentability of products during delivery.

Quality control is carried out using Dinema laboratory equipment that checks strength, elasticity and other parameters. This ensures compliance with high standards. The advantages of Uztex Group products include high quality, comfort and durability, a wide range of socks.

! Minimum order quantity:
1,500 pieces per size.

Dyed yarn

Modern yarn decoration: Quality and technology

Dyed yarn production in Uztex Group is carried out using the latest technology modern equipment and dying by high-quality active dyes. The fully automated dyeing process ensures deep and uniform coloring, ensuring high quality of the finished product. Innovative technologies and modern equipment allow us to achieve excellent results in yarn dyeing. Automation of the process eliminates the human factor, which contributes to the consistency of quality and color saturation at each stage of production.

Quality

The use of high-quality active dyes ensures not only brightness and color fastness, but also product safety, which is especially important for products in contact with the skin. Automation and modern technologies allow Uztex Group offers products that meet the highest quality standards and aesthetic requirements.
