

Polifil

Shade NET

Polifil Shading group provides innovative and high-quality products for various industries. Our knitted nets offer accurate shading percentages and high UV stabilization, making it possible to adapt the system requirements.

Shade NET provides nets for growing, protecting and farming needs. It enables protection against solar radiation, wind and temperature changes, enhancing the right level of humidity and helping maturation in the horticulture industry.

Shade NET

Raffia knitted product, used in:

- Animal barns and shelters
- Open spaces
- Gardens
- Nurseries
- Landscape areas
- Greenhouses

MonoNET is a multipurpose shading and screening net with a coverage range of 75-90%. It is mostly used in open areas requiring higher shading rate and also in construction and tourism where lower cost alternatives are sought.

Raffia and monofilament knitted net which gives it higher tenacity and durability than the regular raffia type, used in:

- Open air areas
- Restaurants, cafes
- Pools
- Car parks
- Animal shelters
- Scaffolding
