

Innovative Concept

Our casting plant is equipped with the latest technology to deliver copper rods of unparalleled quality. Say goodbye to inferior products and hello to a superior standard that will impress the most discerning customers.

Efficiency

With our casting plant, you can significantly increase your production efficiency. Our streamlined process ensures faster production times and lower energy consumption, saving you time and money in the long run.

Custom Design

We understand that every customer has unique needs. That's why our casting designs offers customizable options to meet your specific requirements. From size and shape to alloy composition, we can tailor our production to suit your exact specifications.

THE FUTURE OF CASTING IS HERE

Create your casting plant with our state-of-the-art engineering methods. Join us on the journey towards innovation and excellence in casting. Embrace the future with our cutting-edge engineering.

LET'S TALK ABOUT WHY CHOOSE OUR SOLUTIONS

• Eco-Friendly Practices:

At our casting plant, we prioritize sustainability. Our eco-friendly practices ensure that your copper production is not only efficient but also environmentally responsible. Join us in our commitment to a greener future.

• Expert Team

Our team of experienced professionals is committed to delivering top-notch service and unparalleled results. From design to production, you can trust us to bring your vision to life with skill and expertise.

• Consultation and Customization Options

• Installation and Training Process

• Ongoing Support and Maintenance Services

Don't miss out on the opportunity to revolutionize your casting methods. Contact us today to learn more about our casting applications and how it can benefit your business. Take the first step towards enhanced quality, efficiency and sustainability with our state-of-the-art technology.

About Our Company

RCIcast® presents continuous casting technologies that produces low manufacturing costs and high quality non-ferrous products (copper, copper alloys, and non-ferrous rods). Our systems have been designed for both kinds of raw materials; pure and recycled.

RCIcast® - innovators for casting.
