Ultrasound-guided Filler Injections

Mapping & Injecting 💉

Provide injections as safely as possible by knowing how deep each blood vessel is with a great certainty.

🔍 Evaluating Fillers

Ultrasound can scan the product that has been injected in the past. The product can sometimes cause prolonged swelling or irregularities in the skin. When doctors need to dissolve the injected material, the ultrasound can help them inject hyaluronidase (used to dissolve fillers) precisely. Can help optimize the treatment and dissolve the filler.

The C10MB Pro can be used for all injections in the area of face and neck, including (but not limited to)Botox, lip injections, liquid rhinoplasty, Kybella fat reduction, chin/jawline filler, undereye filler and nasolabial fold filler.

A more reassuring choice **C10MB PRO**

Lighter and smaller
Only 223g easy to carry.

Full waterproof design
IP68 convenient for sterilization.

USB&WiFi two connections
Support working while charging.

Free App, no membership fee
Support IOS/Android/Windows.

Built-in cooling coating

Distance:
1.1mm

Depth:
2.3mm

You can scan the blood vessels with a diameter of 1mm at a depth of 10-40mmsubcutaneous in the face.　Faster, easier and accurate.
Software Feature

Downdoad the "MY USG" APP from
the App Store or Google Play for free

√ Support Dicom

√ Report edit/print

√ Free app & updates, Unlimited users

√ Horizontal&Vertical Screen display

√ Dual-screen display in different modes

Measure Magnify

The boundary of the
target area can be
marked more
accurately.

Probe Specs

Model:　　　 C10MB PRO
Frequency:　 16/20Mhz
Scan Depth:　10-40mm
Elements:　　 192

Mode:
B.B+M.Color.PW. PDI
Channel:　　 64
Waterproof:　 IP68

Adjustable Parameters

B/Color GN(Gain)
