

PINE BM

**CLOSING WOUNDS,
OPENING POSSIBILITIES**

BARBED SUTURES
ABSORBABLE SUTURES

PRECISION-ENGINEERED SUTURES FOR BETTER HEALING

PINE BM

Founded in 2011, Pine BM has become a leading innovator in the Korean suture market.

Our commitment to quality has earned us a strong reputation, with our products being trusted by medical professionals in over 30 countries, including the United States, Europe, the Middle East, and Southeast Asia. We pride ourselves on delivering high-quality sutures that meet the diverse needs of healthcare providers worldwide. Choose Pine BM for reliable, globally recognized suture solutions.

EXPERTISE Delivering superior products and services through advanced medical knowledge and technology.

INNOVATION Creating new medical solutions with ongoing research and technological advancements.

EFFICIENCY Providing outstanding, cost-effective solutions by optimizing resources.

TRUST Building long-term partnerships based on reliability and customer confidence.

Needle

We use needles that have been thoroughly verified for quality and technical expertise.

<p>40 Years of Manufacturing History</p>	<p>Production of more than 238.6 million needles per year</p>	<p>30,000 Types of medical needles produced</p>
---	--	--

Suture Case

The package focuses on not just suture use, but also the entire suturing experience, including **pre - and post - suturing stages**.

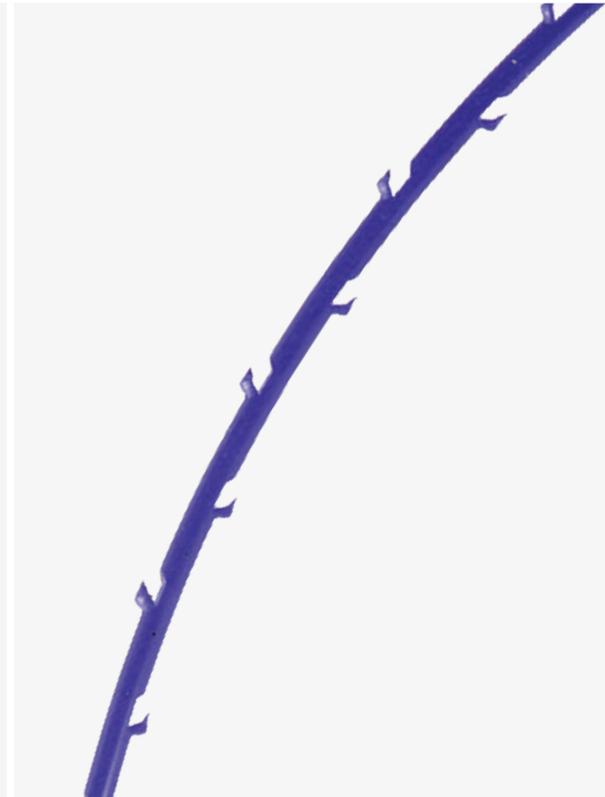

All medical professionals, regardless of their direct involvement in suturing, benefit from Korea's first Race Track Package, engineered for intuitive suture management.

Suture

Certified with CE, ISO 13485 and KGMP, receiving top reviews from customers worldwide.

ABSORBABLE SUTURE

+ GLSORB

Material	Polyglactin 910 (Polyglycolid-co-L-lactide)
Suture structure	Multifilament
USP range	6/0 - 2
Color	Violet, Undyed
Indications	Soft tissue approximation and / or ligation
Tensile Strength Retention	75% at 2 weeks ; 40 ~ 50% at 3 weeks
Mass Absorption	56 ~ 70 days

+ DOSORB

Material	PDO (Polydioxanone)
Suture structure	Monofilament
USP range	6/0 - 2
Color	Violet
Indications	Soft tissue approximation, particularly when extended wound support is necessary
Tensile Strength Retention	80% at 2 weeks; 60% at 4 weeks
Mass Absorption	180 ~ 210 days

Leading the industry

- Full range of major specifications
- Korea's first finished product made of PGLA material
- Maximum convenience for medical staff
- Race Track Package the first of its kind in Korea
- Used in all major medical centers including all 'Korean Big 5 Hospitals'

You can access the product specifications here :

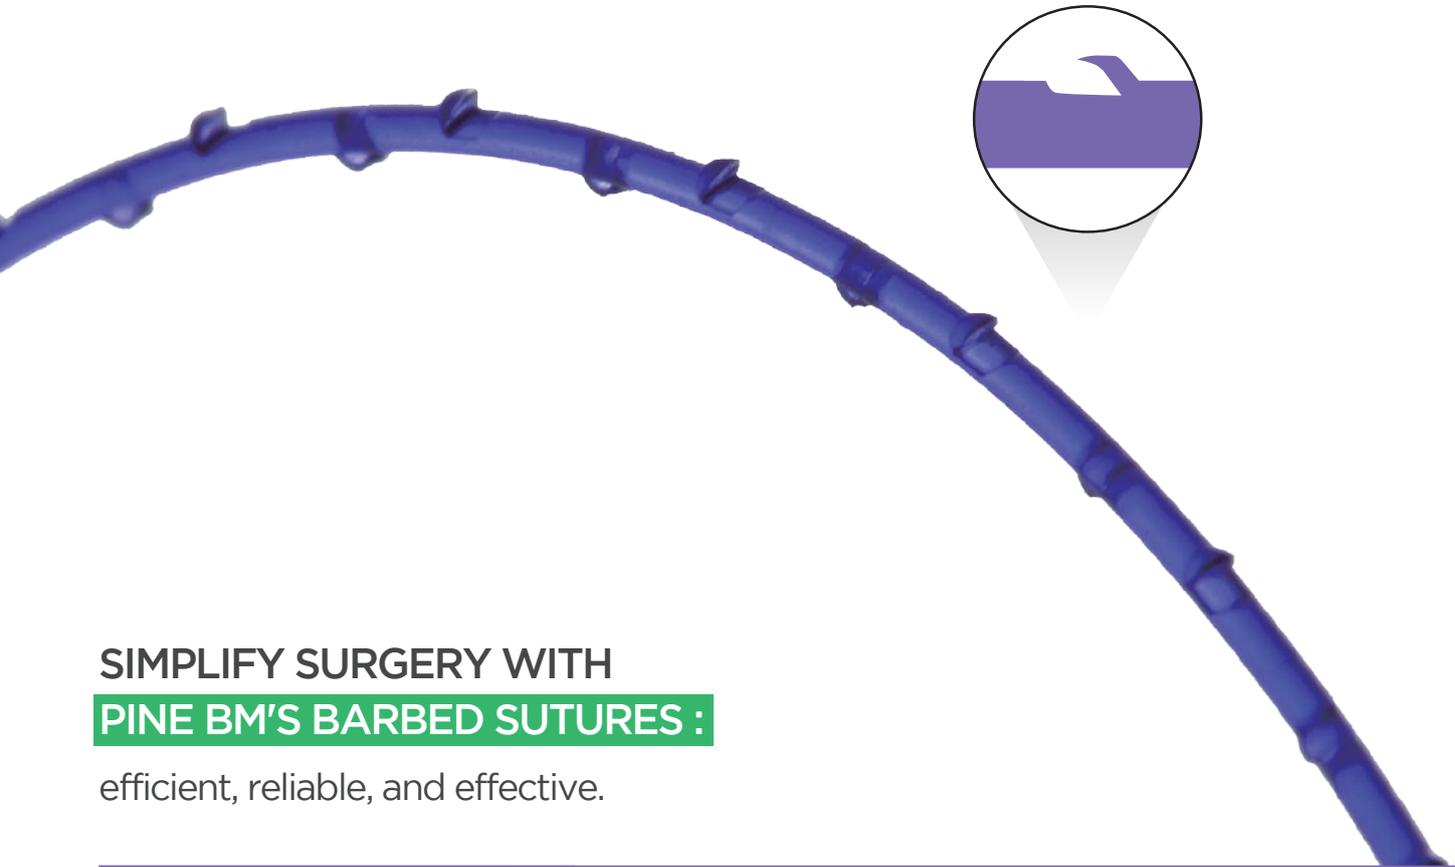

GLSORB

DOSORB

BARBED SUTURE | VSORB

SIMPLIFY SURGERY WITH PINE BM'S BARBED SUTURES :

efficient, reliable, and effective.

+ VSORB

Description	Knotless Wound Closure Device
Structure	- Unidirectional barbed monofilament with end loop - Bidirectional barbed monofilament with double needle
Barbing Pattern	Spiral barbing
Composition	Polydioxanone
Color	Violet
Absorption Profile	180-210 days
USP range	4/0 - 2
Length	14cm-72cm

Dual-angle cut

Dual-angle cut

The lower cut angle offers superior anchoring force, while a shallow cut depth maintains the strand's strength.

Product Features

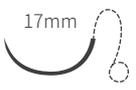

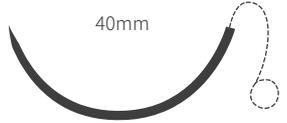

- Dual-angle cut barb design
- Absorbable no-knot wound closure device
- Double needle with bidirectional barbs
- Anchoring loop with unidirectional barbs

Advantages

Consistent Tension	Efficient Suturing	Enhanced Security	Time-Saving	Reduced Suture 'Spitting'

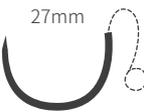

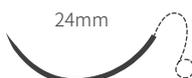

VSORB + END LOOP with unidirectional barbs
