Having healthy kids is a priority in almost all families. Unfortunately this is not always easy and smooth process for many couples. This can be due to physical and psychological reasons. Physical reasons are mostly related to lack of vitamins and minerals. The absence of these vitamins and minerals in the body prevents the body from forming and delivering a baby with a healthy development.

ERSITOL is produced to help individuals to overcome these physical obstacles. It is a good source to compensate for the lack of vitamins and minerals for and during pregnancy.
