

SCENAR devices can be used with the wide variety of the add-on electrodes, which makes the SCENAR treatment even more convenient and efficient.

The electrodes are good in hard-to-reach areas or for specific applications: on hairy zones, eyes, acupuncture points, mouth cavity, face etc.

They can be applied in cosmetology and dentistry, as the supplement tool for massage and back-pain treatment.

Add-on electrodes are intended for use with any model of SCENAR/RITMSCE-NAR devices by medical professionals and by home users.

# SCENAR ADD-ON ELECTRODES

(to be applied together  
with any model of SCENAR  
devices)

### DOUBLE OPHTHALMOLOGIC ELECTRODE

It is intended to provide therapeutic stimulation of skin surface around the eyes.

### DOUBLE COSMETIC ELECTRODE

It is intended to stimulate skin surface for cosmetic needs.

### MULTIPLE ELECTRODE (with stainless steel contacts)

It is equipped with a fixing clamp 'Universal lip-type seal' that allows fixing an electrode on any skin area.

### SINGLE OPHTHALMOLOGIC ELECTRODE ('MONOCLE')

It is intended to provide therapeutic stimulation of skin surface around the eyes.

### POINT ELECTRODE

It is intended to operate by acupuncture points. It can be also applied for Su-Jok therapy.

### CONDUCTIVE GLOVES

The conductive gloves are excellent for used in treatment of Carpal Tunnel Syndrome, arthritic pain and post-operative swelling reduction. It can also be used as a dispersive electrode for the wristlet.

### COMB ELECTRODE

It is intended to stimulate hairy zones of the body.

### SPECIAL Y-TYPE ELECTRODE ('SNAIL')

It is intended to stimulate small skin surface areas, skin areas with 'complex relief'.

### SELF-ADHESIVE PLATE ELECTRODES (PADS) (intended for use with RITMSCENAR® devices)

#### SQUARE ELECTRODE 50\*50 mm (2" x 2")

The universal-type electrodes for application on any area of the body. (4 electrodes in a package)

### FACIAL ELECTRODE

It is intended for cosmetic purposes, to stimulate small skin surface areas (nose wings, eyes). It is also handy in treating children.

### PARAVERTEBRAL ELECTRODE ('PAWNS')

It is intended to treat cervical osteochondrosis, to stimulate 'three pathways'.

### ROUND ELECTRODE 25 mm (1")

They are intended for specific stimulation or on small areas, for example, on the face. Can be used in cosmetology. (4 electrodes in a package)

### BENT POINT ELECTRODE

It is intended for acupuncture, Su-Jok therapy, stimulation of the mouth cavity, teeth treatment.

### SPECIAL DOUBLE ELECTRODE ('PENCILS')

It is intended to stimulate small skin surface areas, skin areas with 'complex relief'.

### BUTTERFLY ELECTRODE 55\*90 mm (2" x 3.5")

Dual polarity butterfly pads for applications on skin areas of complex anatomic relief (bridge of the nose, joints), on areas that have been deformed as a consequence of traumas or diseases (arthrosis). Good for lower back applications. (2 electrodes in a package)

### SPLITTER

It is intended for simultaneous use of 2 add-on electrodes.

### PARAVERTEBRAL ELECTRODE ('STAMPS')

It is intended to stimulate 'three pathways' and might be used for pain management in patients with cervical osteochondrosis.

### CABLE (2-way lead)

2 way lead for pads and conductive garment electrodes.
