Endotracheal Tube

Endotracheal Tube

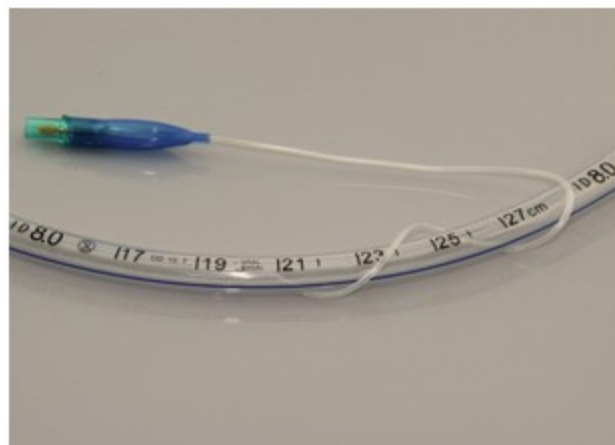

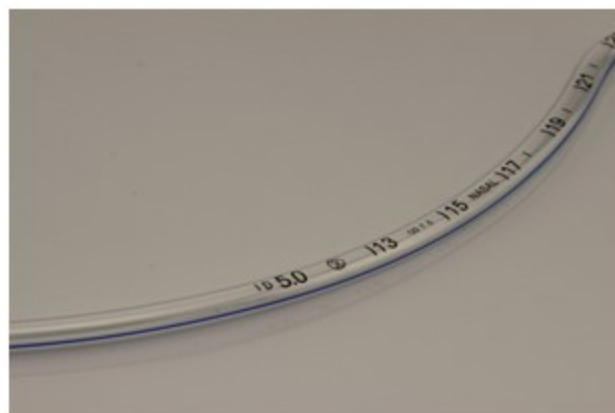

Standard Endotracheal Tube

Standard Endotracheal Tube

- **Tube**

- Thermosensitive and kink-resistant PVC ensure flexibility of tube, perfectly fit to airways
- Double ring marks accurate intubation positioning
- Tube is printed with size, length and other information for quick visual reference
- Smooth tubing wall prevents secretions gathering
- With X-ray line
- Bevel tip, atraumatic and rounded with smoothly formed Murphy eyes

Standard Endotracheal Tube

- **Pilot valve:**

- Small pilot with no printing
- Big pilot with Inner diameter printed on

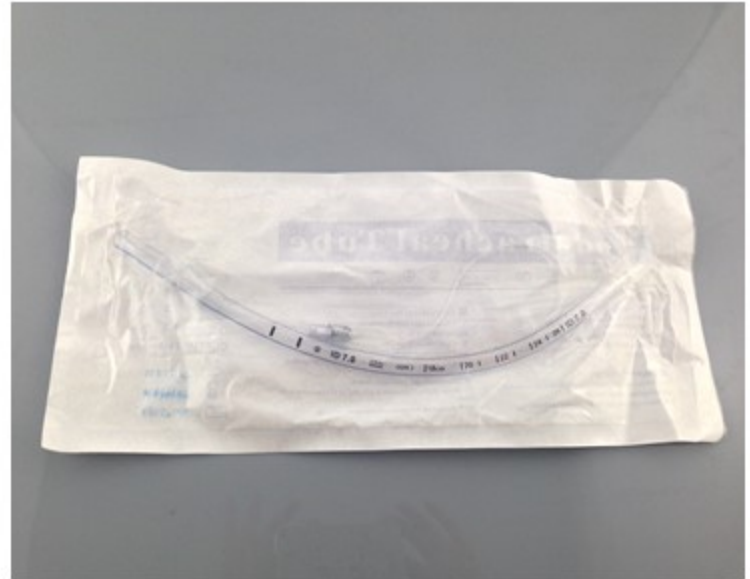

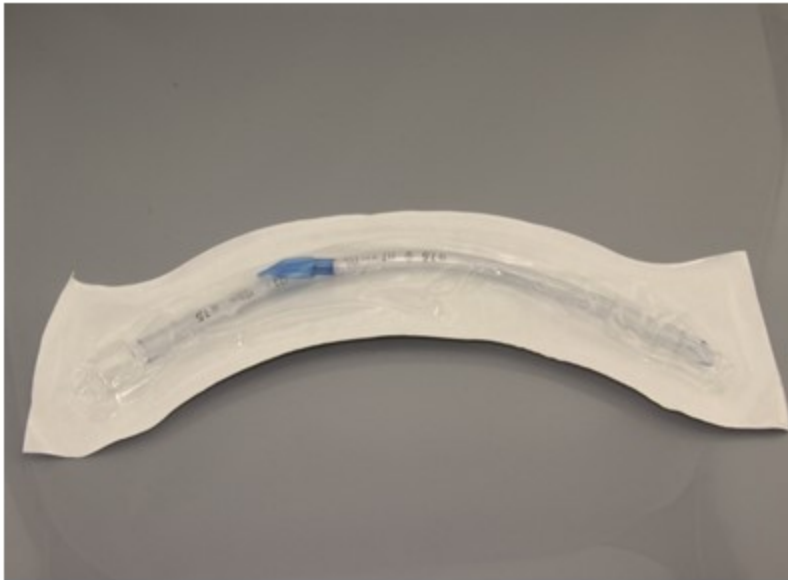

- **Balloon**

- High volume low pressure cuff, minimizes the risk of trauma
- Thin and delicate walls reduce effectively loss of seal

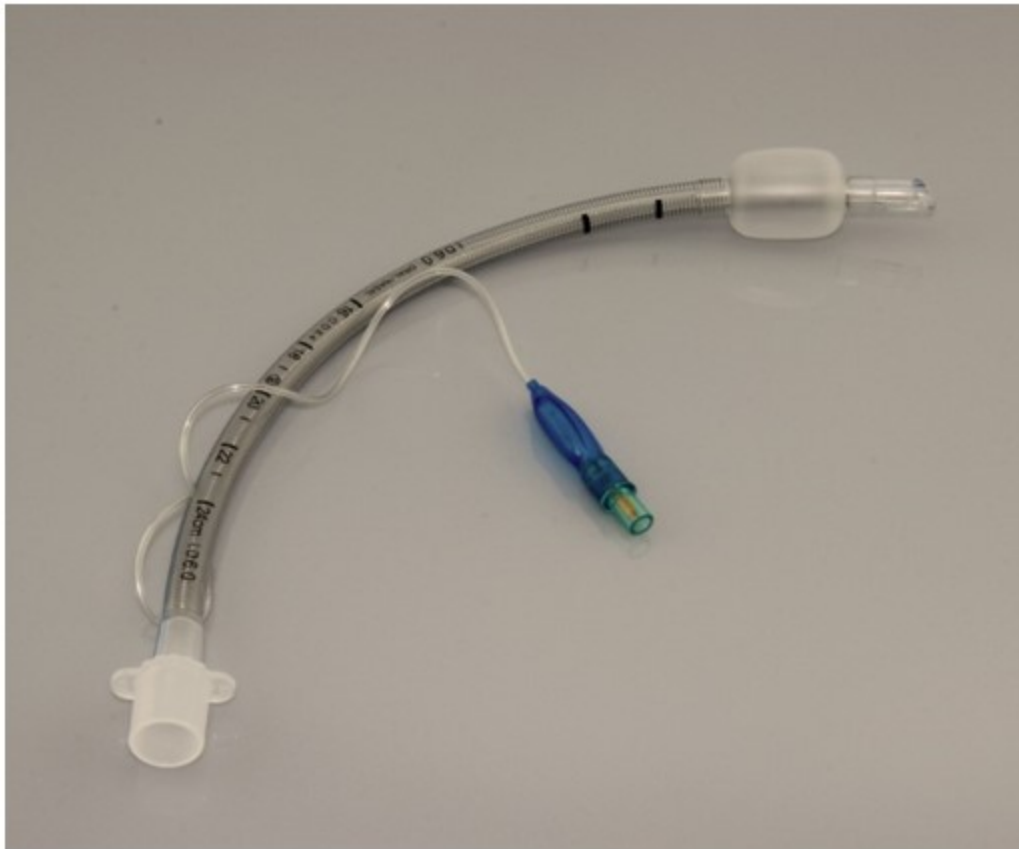

Standard Endotracheal Tube

Packages

Reinforced Endotracheal Tube

Introduction:

With spiral stainless steel reinforcement inside tubing, extremely flexible for and soft for optimal anatomical adaption

2. Smooth tubing wall prevents secretions gathering

Reinforced Endotracheal Tube

- **Tube**
 - With spiral stainless steel reinforcement inside tubing, extremely flexible for and soft for optimal anatomical adaption
 - Thermosensitive and kink-resistant PVC ensure flexibility of tube, perfectly fit to airways
 - Double ring marks accurate intubation positioning
 - Tube is printed with size, length and other information for quick visual reference

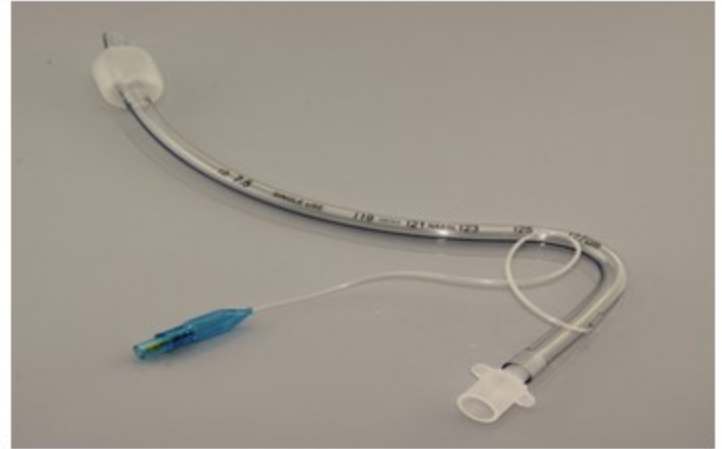

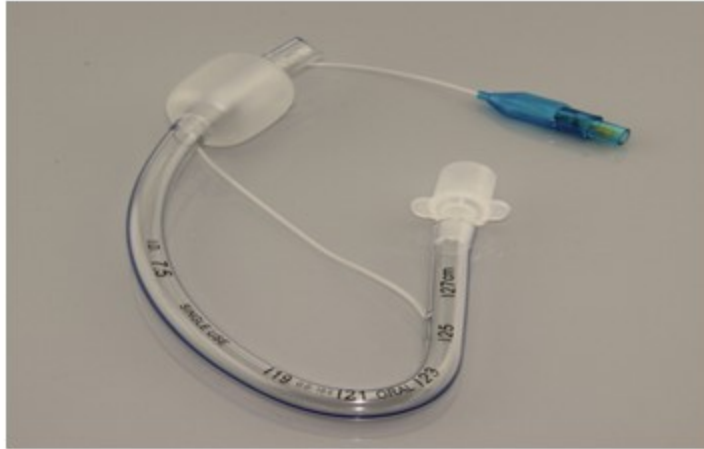

Reinforced Endotracheal Tube

Cuffed and uncuffed Reinforced Endotracheal Tube

Preformed Endotracheal Tube

Preformed Endotracheal Tube

Nasal preformed ETT

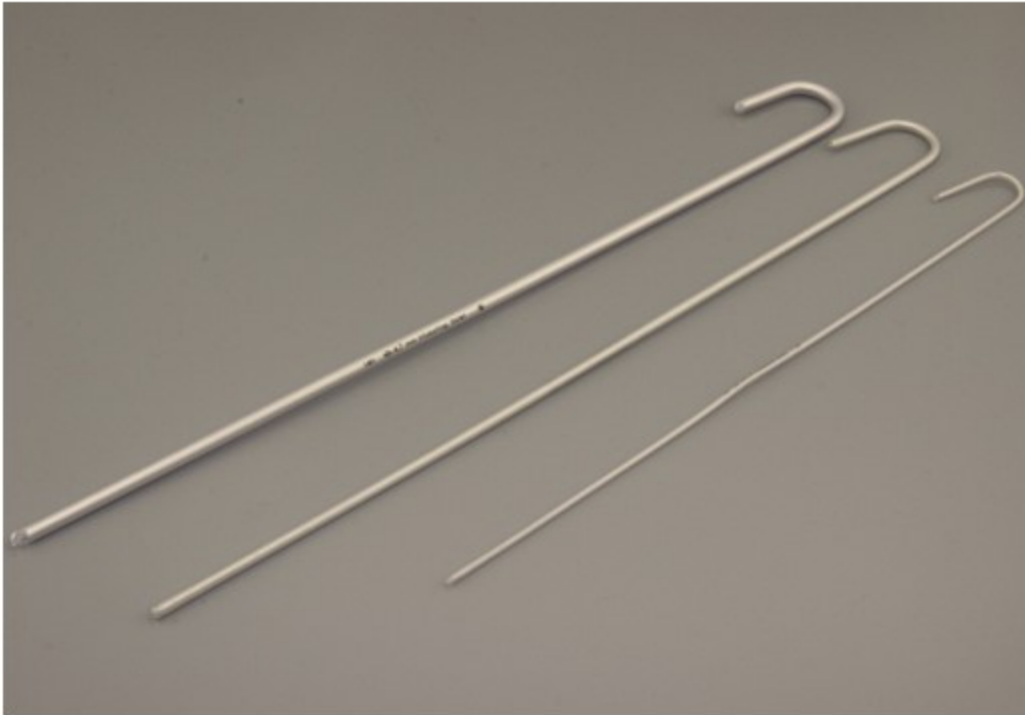

Preformed Endotracheal Tube

Oral preformed ETT

INTUBATING STYLET

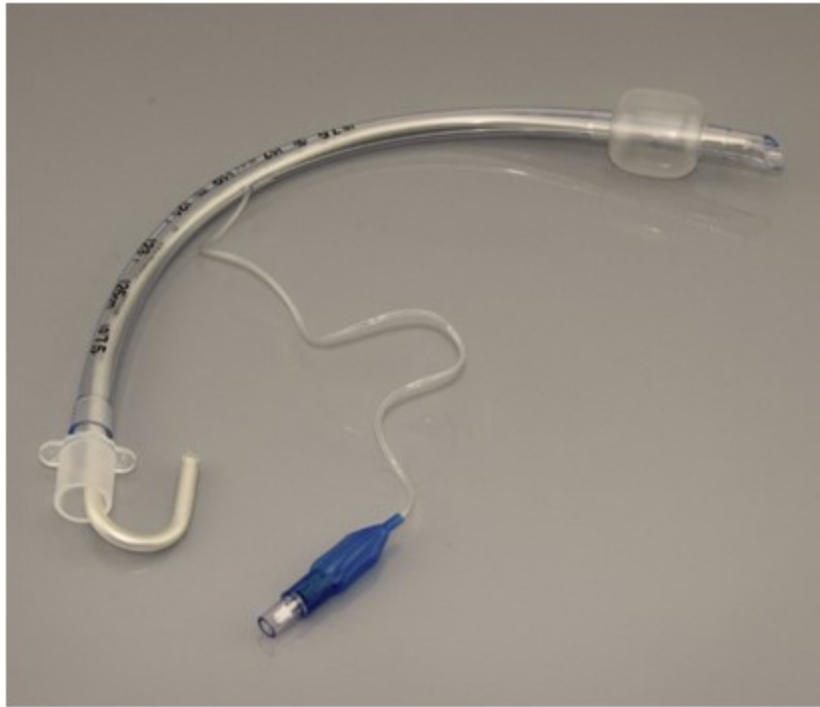

Introduction:

1. Easily adapted to any desired shape for tracheal tube intubation
2. Low friction between stylet and the tracheal tube for easy insertion and withdrawal

Endotracheal Tube with Stylet

Endotracheal Tube with Stylet

ENDOTRACHEAL TUBE INTRODUCER - BOUGIE

Introduction:

1. Designed to assist in tracheal tube exchange during difficult intubation. It is most commonly known as Bougie
2. Size ranges provided facilitate use with tracheal tubes from size 2.0 mm to 10.0mm
