RHINO GROUP

RHN-G SERIES

RHN-G2100

RHN-G3000

Rhino, Its very clear that we all afraid of a rhino when we see them they looking at us. But think about that effieciency in your field against to any material.

When we designing this series we copied the senario at the above.

Mulchers are have thick and solid chasis to stand strong to any hard material are inspired from our big creatures skin.

The speed of machine are inspired from our big creatures speed during its movements to its prey.

Specially designed unbreakable chopper blades are inspired from our big creatures horns.

These proccess are very though to reach these abilities wich all contains at our inspiring creature. But its worth to all of these proccess when we gain our clients trust.

Özbudak Machinery manufactures all gearboxes, chopping blades etc. most important components are manufactured 100% in our own facilities. Rest of the machine's components 98% are produced in our facilities also. Ozbudak Machinery proves it with the certifiicates wich provided by government's authorized instutions.

RHN-G2100 GRASS MULCHER 2100

Ozbudak Grass Mulchers are very useful when you want to remove the unwanted any type of plants from your field.

According to your requests Ozbudak Grass Mulcher blades can modified 3 different modes. Its usually up to wich materials you want to chop (potatos grass, onion waste, maize waste, cotton waste like so many of them)

Also there is always a proper machine for you with different working width. Also tyre model and crusher cylinder models are available up to your chocie.

Specially designed mechanism of Ozbudak Grass Mulchers chopping height can adjusted easily without any spanner.

The 2000turns/per minute chopper blades provides you homogeneus chopping&blowing power. Every one of chopping blades has been trough to 4 process before its latest form. These process gives you strong and solid unbreakable blades.

Like the all other OZBUDAK products, we produce the hundred percent of Ozbudak Flail Mulcher's gearbox units and other components in our facilities. As a matter of fact, the ability of our machine to operate with minimum power requirements is reflected in the fuel and time, it operates with minimum fuel consumption and it is an another plus to our customers.
