

VULCAN (MALYUK)

ASSAULT RIFLE

Due to its small dimensions, the Malyuk rifle can be used in SMG tactical niche. In this role, a special type of 5.45 mm ammunition is used. This type of ammo has 500 m/s speed and can be supplied with or without a steel penetrative core

Advantages of Malyuk weapon-ammo complex:

- Absence of ricochets, usual for standard 5.45 mm
- Absence of over-penetration through target body or obstacle
- Substantial decrease of felt recoil, superb weapon controllability
- Ballistics match standard on actual SMG deployment ranges (50-100 m). Behind the effective range bullet becomes safe fast
- Advanced functionality with the same weight is much more effective than simply adding new heavy components
- Ergonomically designed elements were made with speed and secure deployment in mind
