

TENCATE ADVANCED ARMOUR AT A GLANCE

- › 20+ years' experience in survivability solutions
- › 15+ years' experience in large international defense programs
- › 15+ years' experience in Asia Pacific
- › More than 4.000 different ballistic solutions developed
- › 26.000+ vehicles protected globally
- › 25.000 m² factory floorspace
- › 400+ employees globally
- › Modern manufacturing sites in France, Denmark and USA
- › Regional sales offices and support in Singapore, UK, France, Denmark and USA

WHY TENCATE ADVANCED ARMOUR

- › Understanding local requirements and culture
- › Capabilities in Design, Development, Manufacturing and Integration
- › Wide selection of solutions, including Lightest, Strongest, Cost Effective and/or Lasting.
- › Extensive portfolio of tested and approved ballistic solutions
- › High customer satisfaction with product quality, delivery, reliability and documentation
- › Experienced program management and sales staff
- › High manufacturing capacity and flexibility
- › AS/EN9100, ISO9001, AQAP 2110 D, and ISO14001 certifications

SURVIVABILITY SOLUTIONS

RESEARCH & DEVELOPMENT

TenCate Technical Centre (TTC) is an in-house centre of expertise and excellence, who leads our R&D efforts across material-, solution development and application. The centre includes a state-of-the-art shooting range in Primarette, France, which enables us to verify performance against a wide range of ballistic threats in a short time span.

TenCate has strategic partnerships with several leading raw material suppliers, which provides early access to new materials and often exclusivity for material availability in strategic product launches.

Our R&D efforts are closely linked to customer requirements, early market trends and demands. We take pride in understanding regional and local aspects too.

SURVIVABILITY ENGINEERING SERVICES

TenCate has a large team of experienced engineers, who provide our Survivability Engineering Services, including Project Management, Application Development & Technical Support (ADTS) management and After Sales Support.

Project Managers are often on-site with customers and End Users across various regions and they are also closely connected to our Production Managers and Quality Assurance Managers to ensure timely and highest quality deliveries.

PLATFORM INTEGRATION

TenCate works with a very wide range of vehicle manufacturers, aerospace companies and shipyards across the world. We have experience with many types of integration methods and approaches and can advise what is best for OEMs and End Users. We can supervise armour integration during projects and we can even provide experienced manpower for the integration itself if needed.

Our engineers have various means of generating the correct armour panel CAD design for a successful integration, including the use of 3D scanners or cost-effective templates. Different projects require different approaches. We have experience with them all and knows what works best for each of the interest holders of the project.

TRUSTED LOCAL PARTNERS

We have developed long-term partnerships with trusted local partners who are specialised in various segments of the Land, Sea, Air, Special Forces, Police and/or Commercial markets for survivability. This network of agents/distributors enables us to reach out to all OEMs and End User in many countries. More importantly, it happens in the local language and following local etiquette and culture. We work as a team and we have a proven track record for this collaboration.

SOLUTIONS PORTFOLIO

LAND SYSTEM SURVIVABILITY

- › Add-on armour STANAG 4569 & AEP-55 Level 1 to Level 6
- › Spall liner
- › Composite Structural Armour (CSA)
- › IED and EFP solutions
- › RWS and Optronics solutions
- › RPG solutions
- › Integration & engineering services
- › Simulation
- › Survivability analysis

AIRCRAFT SURVIVABILITY EQUIPMENT

- › Integration/engineering
- › Qualification tests compliance
- › Typical certified solutions
- › Fixations / modularity
- › Composite Structural Armour (CSA)
- › 3D armour panels
- › Seat Armour

NAVAL AND MARITIME SURVIVABILITY

- › Armour solutions for bridge, command/control, engine rooms, cargo bays and weapon systems
- › Gunners' protection
- › Radar transparent armour
- › Survivability analysis
- › Integration & engineering services
- › Installation

PERSONAL PROTECTION EQUIPMENT

- › Body armour plates in ICW Soft Armour configurations
- › Body armour plates in Stand-Alone configurations
- › Handheld ballistic shields
- › Shields on trolley
- › Lighting, viewing and additional protection equipment for shields

LOW PROFILE BODY ARMOUR SOLUTIONS

With the increase in the need for low profile hard body armour for security applications, TenCate Advanced Armour has developed a portfolio of thin plates that provide a high level of ballistic protection while remaining thin enough to be worn under normal clothes to provide a significant lower profile than standard body armour.

TenCate Advanced Armour France S.A.S. is a major tier one provider of personal protection products (P3) for special forces, law enforcement units, large-scale governmental programmes, and for the private security sector. TenCate Advanced Armour operates a portfolio of plates and shields developed to comply with requirements for ballistic protection and user comfort. Special solutions can be developed to accommodate special requirements for new personal protection products.

BODY ARMOUR SOLUTIONS FOR SPECIAL FORCES

TenCate Advanced Armour operates a portfolio of hard body armour plates developed for special forces applications. The plates are developed to cover the most extreme demands for ballistic performance on the upper level of the threat scenario while remaining extremely light in weight to reduce operator fatigue during extended operations. TenCate Advanced Armour offers a ready portfolio of ballistically certified plates but can also support with developing plates that perform in accordance with new requirements in terms of ballistic performance, thickness, mass/density, weight, and other requirements.

TenCate Advanced Armour France S.A.S. is a major tier one provider of personal protection products (P3) for special forces, law enforcement units, large-scale governmental programmes, and for the private security sector. TenCate Advanced Armour operates a portfolio of plates and shields developed to comply with requirements for ballistic protection and user comfort. Special solutions can be developed to accommodate special requirements for new personal protection products.
