

CURVED EDGE BANDING MACHINE

(Code: CEB 60)

Description: Curved edge banding machine tool is used in the furniture sector for serial and uniform coating with skirting tape (PVC edge, etc.) straight, convex and concave edges of the wooden profiles used for the production of furniture.

- Bi-shaft fully automatic curved edge banding

Edge banding machines for curved edges has small size and weight, so that takes up little space on the manufacturing area, ergonomic and portable.

TECHNICAL FEATURES

Mains voltage	380 V, 50 Hz
Thickness of work piece	10 – 60 mm
Thickness of tape	0,4 – 2 mm
Heat	175°C
Air pressure	6 bar
Total power	3 KW
Current intensity	14 Amp
Dimensions	900x1000x1100 mm
Weight	165 kg
