ESDA PACK

Our Company, ESDAPACK AMBALAJ İTHALAT VE İHRACAT SAN VE TİC LTD ŞTİ, was founded in 2021 at Gaziantep Organized Industrial Zone, that is one of the largest Industrial Zones of our country. Our Company, adopting the sustainability and environment awareness as basic principles in its vision statement, continues its production activities in the Paper Package sector.

In order to protect the nature, the escrow of today and the architect of our future, ESDAPACK sustains the environment awareness in all activities, and completed the entire infrastructure and human as-

sets for converting commonly recycled paper products including raw materials consumed from controlled forests into packages which are a part of our lives, and adopted the technology as an inevitable part in its processes and entered into the sector.

ESDAPACK, aiming to sustain quality, hygiene, environment, work health and work safety concepts in all activity processes, welcomes ideas, opinions and feedbacks of all stakeholders for product development and innovation processes and adopts the mutual benefit relation with its customers and suppliers as its basic principle.

Within scope of the ISO 14001 Environment Management System enforced as ESDAPACK:

- Under the scope of all activities we perform, our duty is to work under trust of customers, suppliers, legal authorities and all related parties with mutual cooperation, with respect to environment, to prevent pollution and minimize environment accidents and take protective and preventive precautions to reach these goals.
- We direct our works to minimize environmental impacts of our activities and to contribute in protection of the environment. We follow national laws and regulations, regulate and enforce areas and productions under our control as required by our compliance liabilities and adapt ourselves to possible changes.
- We try to reduce our wastes those may occur during our activities, and dispose created wastes under supervision of legal authorities.
- In order to minimize environmental risks arising from our activities, we raise awareness of our employees and enforce an environment style integrated with their attendance.
- By acting under the awareness of our role in the Paper Bag sector, we use inputs produced from controlled forest trees, monitor and implement laws and practices regarding environment protection and prevention of deforestation.

Why you should use Kraft Bag?

The raising awareness regarding the damage created by materials containing harmful chemicals that are not biodegradable or degraded in long term, directs states and individuals to use natural materials. Nylon bags, which are commonly used, is one of the materials not being environment friendly.

Kraft Paper Bag is the best alternative for nylon bags and pouches. Besides being possible to recycled, not containing any carcinogenic substances, are among reasons for preferring bags and packages made of kraft paper. It is particularly important that packages used in enterprises dealing with the food sector, and in direct contact with food substances, should be made of paper. Our Company has adequate equipment and competence on that issue and can produce solutions to enterprises in all aspects.

QUALITY IS UNDER WARRANTY

Happy employees in a healthy and safe environment.

Within scope of the ISO 9001 Quality Management System, enforced as ESDAPACK;

- We correctly understand expectations of our customers and execute our processes to fulfil these expectations in the best way possible.
- In all our processes acting under the principle of continuous improvement, we perform required activities for fulfilling customer expectations.
- We follow the current technology for enabling continuous update of hardware and software infrastructure, therefore we prevent wastages those may occur in our processes and respond to expectations more rapidly.
- We follow legal regulations of our country and countries of our customers, we reflect them to our products and processes and assure the quality under international standards.
- We determine, fulfil education needs for further development of our employees in all processes, and sustain our targets for reaching the better all the time.

Trustable and reuseable produce...

It performs its works in ISO 9001 Quality Management System, ISO 14001 Environment Management System, ISO 45001 Work Health and Safety Management System standards, and supervised by International Accredited Certification Bodies.
