

KAĞIT AMBALAJ İNŞ. SAN. TİC. A.Ş.

**TURAN PAPER PRODUCTS**

## ABOUT US

Journey of Turan Paper Products in the paper packaging industry began by a paper trading business along with a paper bag assembly facility in 1961 with Mr. Turgut Turan's unique vision, the founder of the company.

Having provided services through its branch offices and distributors in various cities throughout Turkey for many years, our company took place among the leading producers in the paper packaging industry in Turkey.

Currently, Turan Paper Products has manufacturing plants in two cities, Izmir and Eskisehir with a team of more than 50 employees.

We have been improving our production capabilities by converting creativity and brilliance into manufacturing, which we have never lost since the inception of our journey in the paper industry.

Turan Paper Products İzmir / Turkey

## WHAT WE DO

With 60 years of experience in the paper industry, Turan Paper Products is one of the leaders in Turkey.

Inside of our warehouse in Eskisehir

In our Eskisehir plant, we mainly focus on paper processing. Reel and sheet cutting, printing, waxing, lamination processes are carried out and products such as paper honeycombs, paper bags, and press boards are produced.

In addition to manufacturing activities, we have a trading business to distribute products supplied from the leading domestic paper producers and we also have a very strong international supply network for fulfilling the unique paper product needs of our customers.

In the Izmir plant, we make our highly demanded ***flat-handled Kraft paper shopping bags***, which is our main export product.

## KRAFT PAPER SHOPPING BAGS WITH FLAT HANDLES

In 2019, we made a substantial investment in high-technology paper bag machinery & equipment for our Izmir manufacturing plant, and we successfully launched the production of **flat-handled kraft paper shopping bags**. Since then, we have been producing around-the-clock to keep up with the international demand. We are exporting kraft paper bags to over 20 countries currently including USA and several European countries.

*Healthy and environment friendly*

*Cost-effective*

*Preferred and demanded by customers*
