STRONG LOCAL PRESENCE

Perfektüp produces over 40 million aluminium tubes annually for Turkey's leading pharmaceutical producer

Perfektüp produces aluminium aerosol cans for Evyap's popular deodorant brand, 'Emotion', which is exported all over the world

Perfektüp is one of the main laminate tube supplier of Turkey's leading chocolate producer, Ülker, supplying over 30 million tubes annually

Perfektüp produces aerosol cans for Lider Kozmetik, supporting their brands in Turkey and exports to many countries globally

Bilim ilaç is one of the key accounts of Perfektüp in the pharmaceutical industry who exports mainly to Europe

Perfektüp produces aluminium aerosol cans for "Dunlop" and "Slazenger" deodorants, which has been offered to Turkish consumers since 1989

STRONG GLOBAL PRESENCE

Perfektüp produces aluminium tubes for Bayer's main dermacosmetic brands

Perfektüp supplies products for use in production facilities in 4 countries

Perfektüp has produced 500 different tube types for UHU since 1998 and is their global supplier for aluminium tubes

Perfektüp supplies products for use in production facilities in 3 countries

Perfektüp supplies products for use in production facilities in 3 countries

Perfektüp is the leader in supplying aluminium aerosol cans and aluminium tubes in the Middle East & North Africa regions

PHARMACEUTICAL

Aluminium & Laminate Tube

Perfektüp plays a strategic role in the delivery of medicines right to the patient, as a packaging solution partner to pharmaceutical manufacturers.

Perfektüp has been exceeding the pharmaceutical industry quality standards since its inception.

Aluminium & Laminate Tube

Perfektüp has been a leader in Premium decoration Technologies enabling the latest consumer trends on the market through a strong collaborative customer oriented approach.

PERSONAL CARE & COSMETICS

Aluminium Aerosol Cans

Leading in Aerosol can shaping and decoration Technologies with over 47 years of experience, allows Perfektüp to delight their customers with the latest Premium consumer packaging on the market.

This achieved with the assurance of
The latest rigorous online pressure leaking
Quality testing equipment, ensures rapid
Speed to market delivery of Premium
Aerosol products for our global and
local customers

FOOD

Aluminium & Laminate Tube

Chocolate, molasse, honey, hazelnuts, peanuts, olives, Cheese paste, sauce, seafood products are being served in tubes more and more each year.

Perfektüp contributes to the rapid growth of the industry by meeting the critical quality standards and presenting customised product sizes.

STATIONERY & CHEMICAL

Aluminium Tubes and Aerosol Cans

By using high-end aluminium and laminated tubes, PERFEKTUP bypasses technical difficulties of carrying adhesives, and offers top-of-the-line solutions for industrial adhesive products.

With our cylindrical aluminium boxes alongside our, aluminium and laminated tubes, we are also a preferred supplier of the stationery & art supply sectors.

Our inspiring products for these sectors are decorated with special colour and design solutions made possible with our high-tech manufacturing and printing facilities.

ORAL CARE

Laminate Tube

PERFEKTÜP leverages its in-depth expertise in the medical and cosmetics sectors when creating its range of hygienic, bright and standards-compliant products for all your oral and dental care products.

Our broad spectrum of high-tech printing solutions make your products attractive for all age groups and market segments.

The high barrier capacities of our container products enable maximum protection for all your product types.

LAMINATE TUBE

Our laminate tube production, which started in 1993, has continued to further advance its capacity, customer portfolio, and quality with technological investments.

We have 6 production lines with an annual production capacity of **220 million tubes** with ABL and PBL structures that provide long-lasting protection for oral care, cosmetics, pharmaceuticals and food industries.

We offer **6 color printing**, additional lacquer, silver and gold foil, embossed print and screen printing options on white, clear and silver laminate surfaces, and we also have a wide range of plastics, shoulders and covers.

DIMENSIONS

Diameter/mm	Shortest Width	Longest Width	Exterior

35	120	200		x	x	x
40	120	200		x	x	x

AEROSOL CAN

We produce standard, rimmed, transfer shoulder, embossed aluminum aerosol cans preferred by world-leading companies in various industries such as personal care, chemistry, stationery, pharmaceutical, and food.

Our products meet all customer requirements in diameter, size, shape and durability for different pressures (12, 15, 18 bar). Additionally, we produce screw-can bottles in diameters of 45, 50 and 53..

We can produce in all colors with many types of background enamel choices including transparent, white and gold on the aluminum surface during the printing stage. Finally, we can apply matte, semi-matte, glossy and silvery exterior lacquers on the surface. To prevent the product's interaction with the metal internal surface, we employ state-of-the-art production methods to cover all our products with epoxy phenolic lacquers.

RE-PERFEKTÜP

At Perfektüp, our production includes industrial processes and raw materials that support recycling and sustainability in all of our products.

We produce laminated tubes using 100% recyclable PBL (Plastic Barrier Laminate) materials that contribute to reducing our carbon footprint. We also aim to reduce plastic consumption by using thinner laminate materials.

We use PCR (Post-Consumer Recycled) materials derived from the recycling of end-consumer aluminum products when producing our aluminum tubes and aerosol cans.

We produce our aluminum tubes and aerosol cans by using aluminum slugs with PIR (Post Industrial Recycled) materials, which are obtained by recycling industrial aluminum products.

We reduce the carbon footprint of our production processes by using aluminum washers with PCR and PIR materials.

PRINTING TECHNIQUES

The lion, parrot and leopard figures we printed in our “Wildlife” selection with our “soft touch” and embossed relief techniques highlights the plight of endangered species with a vibrant and eye-catching product range.

The vibrant colours of our New Year series result from relief, serigraphy, and “soft touch” printing techniques, and our bright selection of holographic paints.

SCREW NECK BOTTLES

Our environmentally friendly, screw-neck bottles are suitable to a variety of uses, especially in the body care and cosmetics sectors, with 45, 50 and 53-size bottle-neck threads.

FUTURE INVESTMENTS

At Perfektüp , we know that success depends on continuously developing ourselves and growing our business.

Our new generation integrated production facility in Kırklareli will revamp our business volume, production means, and sustainability potential.

Our facility, which partially produces its own energy through the solar panels on its roof, stores and sends solid waste to recycling with integrated internal systems, has waste-water treatment plants, collects rainwater for general-purpose use, and treats harmful gases before releasing them to the atmosphere. In this respect, our production facility will have as comprehensive potentials for sustainability as it does for production.

OUR NEW INTEGRATED PRODUCTION FACILITY

76.000 square meters

indoor factory area

35.000 square meters

Aluminum tube factory area

30.000 square meters

Aerosol can factory area

11.000 square meters

SUSTAINABILITY AND SOCIAL RESPONSIBILITY

At Perfektüp, we place environmental and social responsibility at the center of our life.

We continue to make a difference in Turkish society by pioneering social responsibility projects such as the 75th Anniversary Memorial Forest, the Traditional Perfektüp Painting Contest, and the Turkish Youth Philharmonic Orchestra.

Apart from these activities, we also reflect our sustainability approach on our production processes. We recycle reusable waste such as paper, plastic, glass and metal through internal recycling processes at our aluminum tube and aerosol can production facilities.

We have certified our sustainability efforts with the Zero Waste Certificate issued by the Ministry of Environment and Urbanization of the Republic of Turkey. As a signatory of the New Plastics Economy Global Commitment launched in cooperation with the United Nations Environment Programme (UNEP) and with the support of the Ellen MacArthur Foundation, which supports circular economy initiatives, the Bell Packaging Group, our parent company, aims to attain a “Zero Environmental Footprint” goal in its plastics and metal production facilities by 2025.
