## GRAPHIC DESIGN

You dream, we design?..

We are aware of the importance of package design for the products sales. A good package should save the products from external factors, make transportation; storage and delivery processes easier but most importantly persuade customers to but by its attractiveness.

Graphic Design of package is the language of the product. It reflects products? all properties to the consumer and touches the feelings of them. With this viewpoint, our expert staff aims to meet the demands of our customers? respecting their unlimited imagination. Also, with the yearly experience of our staff, we choose according to products properties and storage conditions. With this right choice, we have minimum waste of material.
